Photoshop Project
CD Cover

Fairport Convention is a respected English folk group that writes songs about English history and English society. They have just produced their latest CD, The Streets of London, and you have been contracted to produce a cover for the CD.

There are three photographs that have been provided for you to place on the cover. They can be viewed of the following pages.

- BACKGROUND, which is a picture of the tower bridge in London.

- TOWER, which is a picture of a the Tower of London

- STATUE, which is one of hundreds of statues that are present in London.

The photos are in the IMAGES folder on the SAMPLE IT PROJECTS CD, or you can copy them from this document.

Your task will be to improve the look of both the BACKGROUND and TOWER photographs which are not as clear as they could be, then combine the three photographs together to create a cover for the CD.

The following steps need to be completed:

1   The BACKGROUND and TOWER photographs are too dull as they were taken at dusk. Improve them by applying some of the Photoshop enhancement tools.

2   Remove the time and date from the BACKGROUND Photograph.

3   Crop the BACKGROUND Photograph so that it is straight.

4   Separate the TOWER image from its sky background and place it over the BACKGROUND Photograph.

5   Separate the STATUE from its background (building and sky) and place it over the BACKGROUND as well.

6   Add the title of the CD and the name of the group somewhere on the CD cover.

7   Add a frame to the CD cover if you wish and include some drawing enhancements.
