This product is available in Single or Multi User versions.

Single-user versions are for single person use at any particular time, just as a single text book would be used. If you intend to use the notes with multiple students the single user version should be upgraded to the multi-user version.

Multi-user versions allow the school or institution to print as many copies as required, or to place the PDF files on the school network, intranet and staff laptops. A certificate of authentication is provided with multi-user versions. Bookmarks provide links to all headings and sub-headings, and individual chapters are provided.

Every effort has been made to ensure that images used in this publication are free of copyright, but there may be instances where this has not been possible. Guided Computer Tutorials would welcome any information that would redress this situation.

Learning Microsoft Word 365, 2023

Module 1 Contents

Chapter 1: Introduction to Microsoft Word

Loading Microsoft Word	1-1
The Microsoft Word Screen	1-2
The Menu Bar	1-2
The Quick Access Toolbar.....	1-3
The Ribbon.....	1-4
Document Views	1-6
Zoom Controls	1-6
Entering Text.....	1-7
Changing the Format of Text.....	1-8
Text Effects	1-11
Clearing Formats.....	1-14
Closing the Document.....	1-15
Learning the Word Processor	1-15
Entering a Sentence	1-15
Word Wrapping.....	1-17
Deleting Text.....	1-19
Changing the Writing Styles	1-21
Adding a Heading	1-23
Other Ways of Highlighting Text	1-25
Saving Your Document.....	1-28
Printing Your Work.....	1-29
Word Processing Assignment 1	1-31

Chapter 2: Aligning Text

Loading a Prepared Document	2-1
Line Spacing.....	2-3
Justifying Text	2-5
Centre Justified Text	2-6
Right Justified Text.....	2-6
Full Justified Text.....	2-7
Left Justified Text.....	2-8
Tab Stops.....	2-8
Displaying the Rulers.....	2-9
The Ruler Units.....	2-9
Setting Left Justified Tab Stops	2-10
Changing Tab Stop Positions.....	2-11
Removing Tab Stops	2-12
Centre Justified Tab Stops	2-13
Right Justified Tab Stops	2-14
Using the Tabs Dialogue Box.....	2-15
Looking at the Tab Presses.....	2-16
Word Processing Assignment 2	2-18

Chapter 3: Spell Checking Documents

Loading a File Containing Spelling Mistakes	3-1
Checking the Spelling of the Document	3-2
Manually Changing Words	3-4
Saving the Document Under a Different Name	3-6
Counting the Words in a Document	3-6
Using the Thesaurus.....	3-8
The Editor Pane	3-10
Using Spelling Shortcuts.....	3-12
Quick Spell Checking	3-12
Automatically Correcting Words	3-14
Entering Phrases From One Word.....	3-16
Removing Automatically Correcting Words.....	3-18
AutoCorrect Exceptions.....	3-19
Changing the Case of Words	3-20
Read Aloud.....	3-21
Word Processing Assignment 3	3-22

Chapter 4: Moving Text

Cursor Movements.....	4-1
Loading a Sample Document	4-1
The Scroll Bars	4-2
Inserting Page Breaks.....	4-3
Removing Inserted Page Breaks	4-5
Inserting Page Numbers	4-6
Copying Text.....	4-8
Pasting Text	4-9
Paste Options	4-10
Moving Text	4-12
Using Cut and Paste	4-12
Using Drag and Drop	4-14
Selecting all the Text	4-16
Copying Text from one Document to Another.....	4-18
Displaying Two Files on the Screen	4-19
Word Processing Assignment 4	4-21

Chapter 5: Find and Replace

Loading a Sample Document	5-1
Finding Text	5-1
The Find Options	5-3
Finding Whole Words	5-5
Ignore Case	5-5
Replacing Text	5-7
Replace All	5-10
Word Processing Exercise 5	5-10
Quick Search	5-11
The Go To Command	5-11
Word Processing Assignment 5	5-12

Chapter 6: Margins and Indents

Page Margins.....	6-1
Loading a Sample Document	6-1
Changing Margins Using Page Setup	6-2
Manually Adjusting Page Margins Using the Ruler.....	6-3
Page Indents	6-5
The First Line Indent Marker	6-7
Hanging Indents	6-8
Turning the Automatic Numbering Off.....	6-8
Creating the Hanging Indent.....	6-10
Setting Paragraph Spacing	6-13
Entering the Second Point	6-14
Copying Formats.....	6-14
Looking at the Ruler Measurements.....	6-17
Word Processing Assignment 6	6-18

Chapter 7: Bulleted and Numbered Lists

Turning on Automated Lists.....	7-1
Entering the Headings	7-2
Entering the Points.....	7-3
Formatting the Bullets	7-5
Adjusting the Indents	7-6
Custom Bullets.....	7-7
Numbered Lists	7-9
Setting the List to Numbers	7-9
Lettered Number Lists.....	7-10
Customizing Numbered Lists.....	7-10
Renumbering Lists	7-12
Word Processing Assignment 7	7-16

Chapter 8: Headers, Footers and Footnotes

Headers and Footers	8-1
Loading the Prepared Document	8-1
Inserting a Header	8-1
Inserting a Footer	8-3
Adjusting Headers and Footers	8-5
Title Pages.....	8-6
Inserting a Page	8-6
Previewing the Document	8-9
Setting the Title Page	8-10
Page Borders	8-11
Footnotes	8-13
Entering the First Footnote.....	8-13
Entering the Second Footnote.....	8-14
Entering a Footnote Including a Degrees Symbol	8-16
Deleting Footnotes.....	8-18
Converting Footnotes To Endnotes	8-19
Inserting a Third Page	8-19
Converting the Footnotes	8-20
Cover Pages	8-21
Removing the Current Title Page.....	8-21
Inserting the Cover Page	8-23
Removing the Page Border	8-25
Word Processing Assignment 8	8-27

Chapter 9: Placing Text in Columns

Loading a Prepared Article	9-1
Setting Text into Two Columns.....	9-1
Preliminary Settings	9-1
Setting the Columns	9-2
Justifying the Text	9-3
Inserting a Column Break.....	9-4
Adding a Header	9-6
Adding a Footer.....	9-7
Previewing the Page.....	9-9
Using More Than Two Columns	9-9
Removing a Column Break.....	9-9
Inserting New Columns	9-10
Inserting New Column Breaks.....	9-10
Automatically Levelling Columns	9-13
Adjusting Columns	9-15
Adding Lines Between Columns.....	9-15
Manually Adjusting Column Widths	9-17
Word Processing Assignment 9	9-20

Chapter 10: Drawing Tools

Drawing a Rectangle	10-1
Resizing Shapes.....	10-2
Drawing Other Shapes.....	10-2
Objects	10-3
Deleting Objects.....	10-3
Copying Objects.....	10-5
Moving Objects	10-6
Filling Objects.....	10-6
Removing Fill Colours	10-7
Shape Outlines.....	10-8
Line Colour	10-8
Line Weight.....	10-9
Dash Styles	10-9
Altering Shapes.....	10-10
Changing a Shape into Another Shape	10-10
Adjusting a Shape.....	10-10
Rotating a Shape.....	10-11
Adding Edit Points.....	10-11
Shape Styles	10-12
Shadow Effects	10-12
3-D Effects.....	10-15
Adding Text to Shapes	10-17
Text Within Shapes	10-17
Placing Text Over Shapes.....	10-19
Fill Effects	10-21
Textures	10-21
Gradient Fills	10-22
Formatting Gradient Fills	10-23
Grouping Objects	10-27
Word Art Text.....	10-28
Word Processing Assignment 10	10-31

Chapter 11: Inserting Media Into Documents

Inserting an Image	11-1
Changing the Size of the Image	11-2
Picture Adjustments.....	11-3
Colour Adjustment	11-3
Contrast and Brightness.....	11-5
Compressing Pictures.....	11-6
The Reset Picture Command.....	11-6
Picture Styles.....	11-7
Quick Styles	11-7
Picture Border	11-8
Picture Effects	11-9
Rotating Images.....	11-9
Picture Formats	11-10
Adding More Images	11-12
Cropping Images	11-14
Inserting Online Images.....	11-15
Inserting 3D Images.....	11-17
Text Wrapping	11-19
Inserting Images Into Documents	11-19
Loading the Sample Document.....	11-19
Inserting a Cake Image.....	11-20
Resizing the Image	11-21
Wrapping Text Around the Image	11-21
Adding a Watermark Image.....	11-24
Word Processing Exercise 11	11-28
Word Processing Assignment 11	11-29

Microsoft Word Project 1

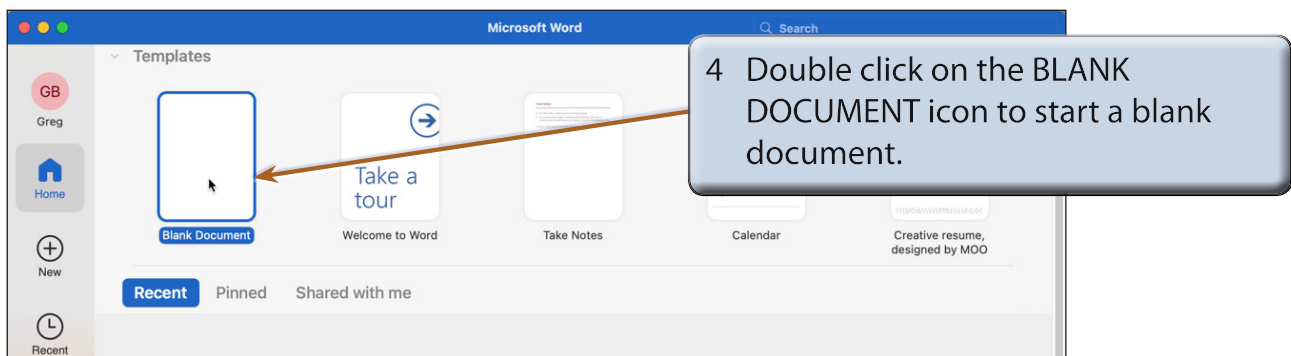

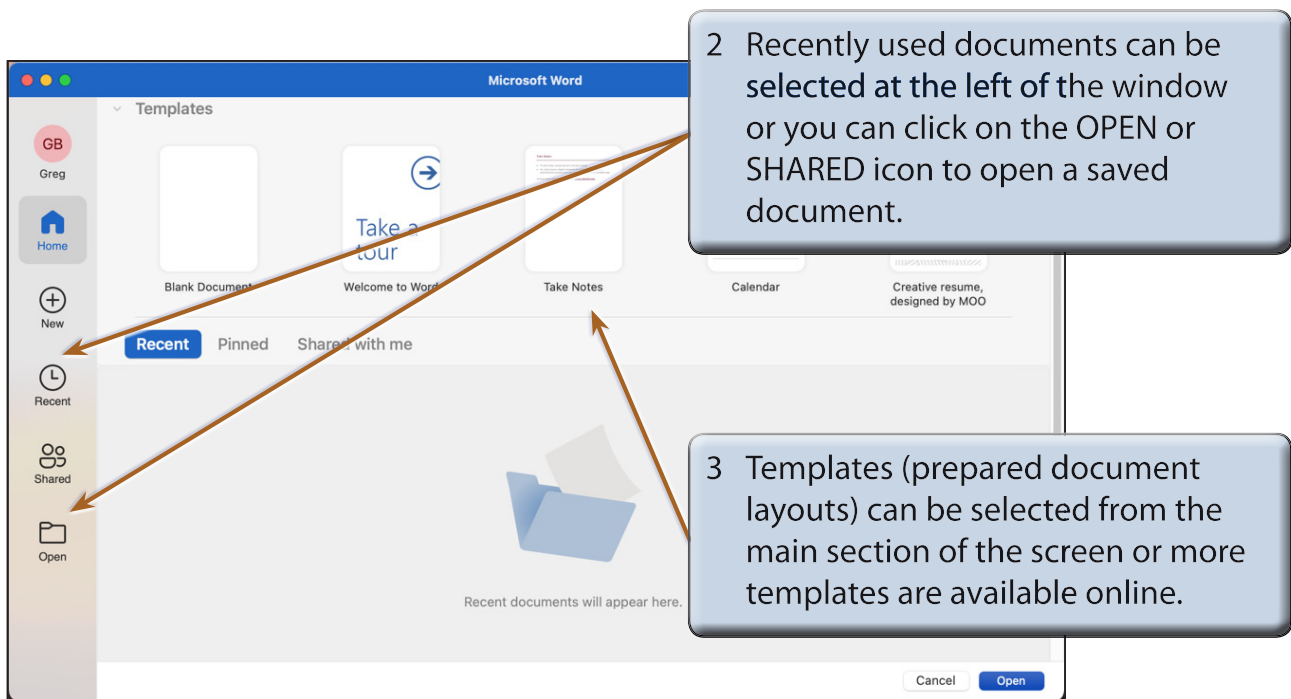

Job Application Task	P1-1
----------------------------	------

Introduction to Microsoft Word

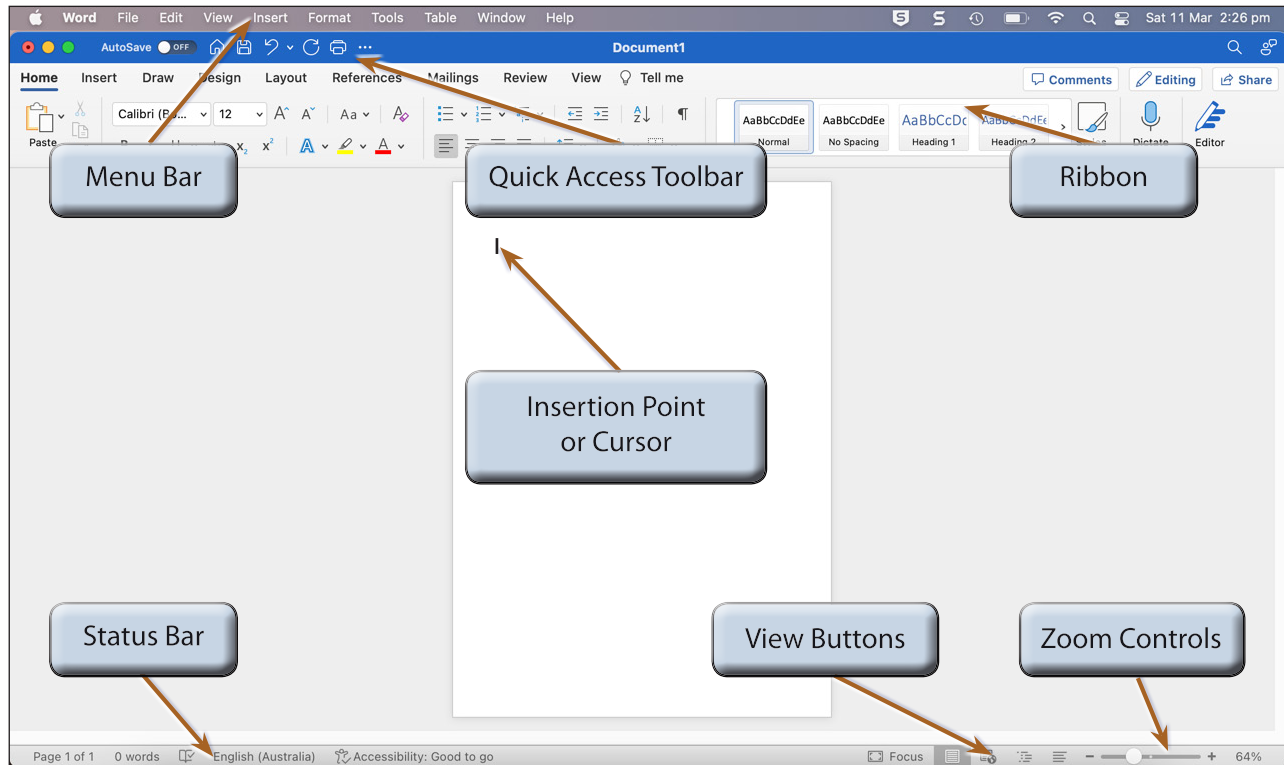

Microsoft Word is a powerful word processing program that allows you to enter text, make changes to it, format it, record it and print it. You can use Word to produce professional business letters, reports, job applications, personal resumes, curriculum vitae, essays, class projects, etc.

Loading Microsoft Word

- 1 Load Microsoft Word and you should receive the following START screen.

- 5 Look at the following labelled Microsoft Word screen and refer to it until you are familiar with all the components.

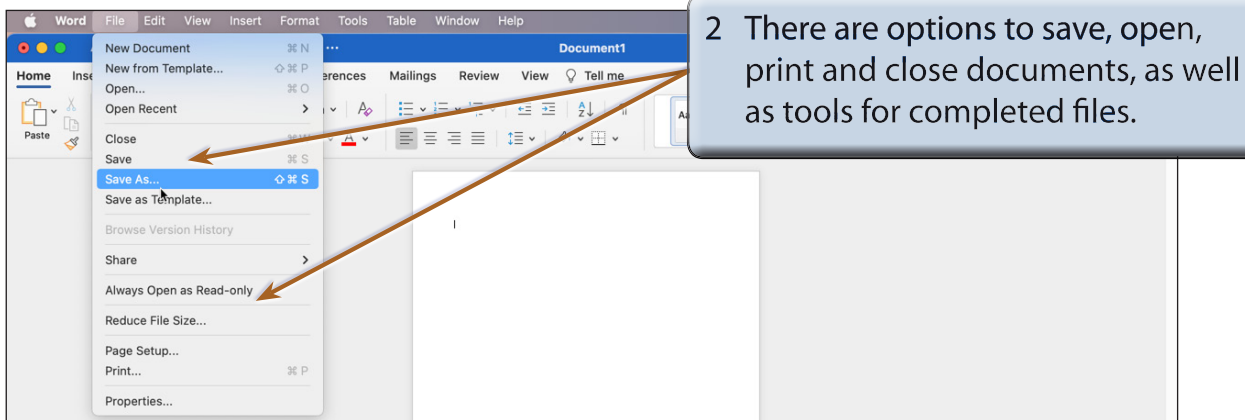

The Microsoft Word Screen

The Microsoft Word screen has a number of different sections.

A The Menu Bar

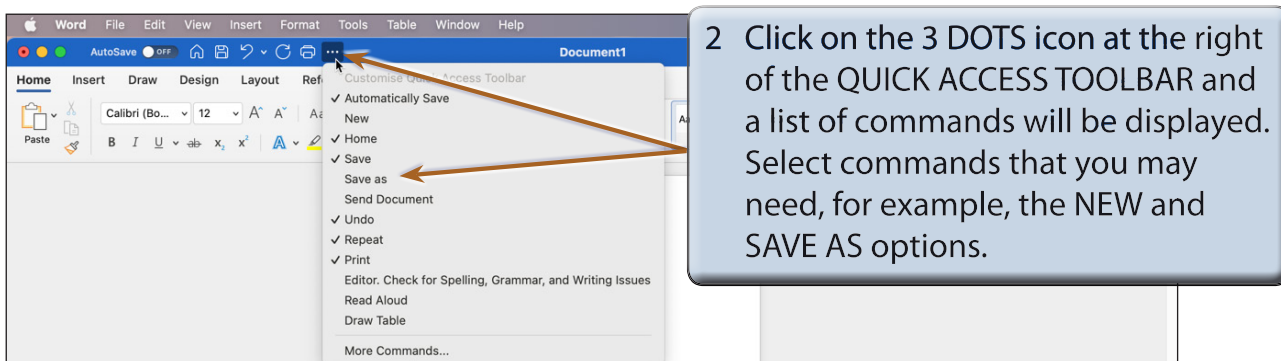

The MENU BAR provides tools to save, open, print and close documents, as well as tools to adjust completed files.

- 1 Click on the FILE heading in the MENU BAR.

- 3 Try some of the other MENU BAR headings to view the options available in those.

B The Quick Access Toolbar

C The Ribbon

The RIBBON across the top of the screen contains most of the Word commands in a variety of command TABS.

- 2 Click on each command TAB in turn to see what groups of commands they contain.

Home Tab: Contains the most common commands for formatting and editing text.

Insert Tab: Contains commands for adding items to documents, for example, pages, breaks, graphics, headers and footers, etc.

Draw Tab: Contains drawing tools primarily for touch screens.

Design Tab: Contains commands for page design, for example, page themes, page colours, page borders, etc.

Layout Tab: Contains tools that control how pages look on the screen or when printed. These include margins, columns, paper size, etc.

References Tab: Contains tools for highlighting or referring to sections of a document. These include footnotes, table of contents, bibliographies, etc,

Mailings Tab: Contains tools to carry out mail-merging of data into letters, envelopes or labels.

Review Tab: Contains tools for checking documents. These include spell checking tools and a thesaurus.

View Tab: Contains tools to view documents on screen. These include zoom and document view commands.

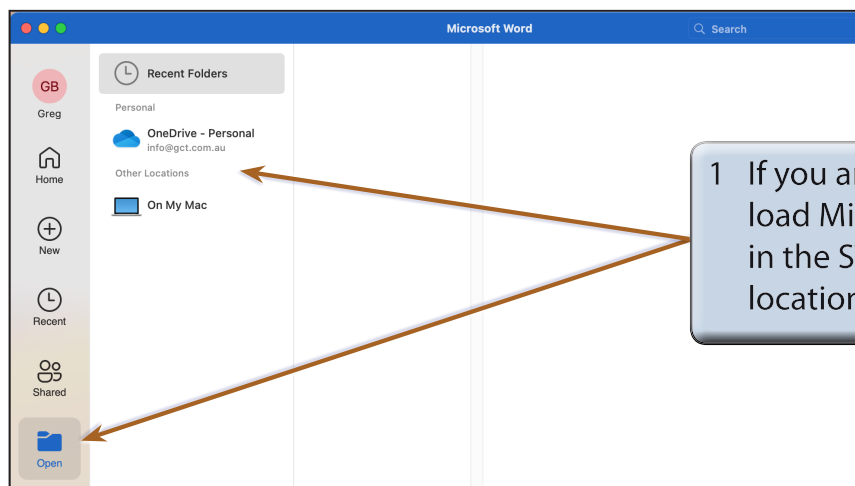

Help Tab: Contains help, support and training tools.

Aligning Text

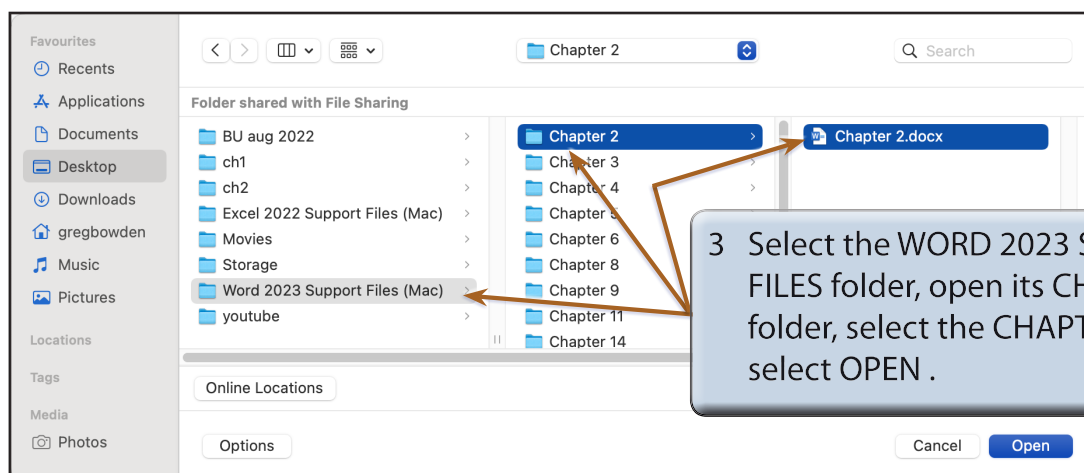

Microsoft Word allows you to do far more detailed formatting than just changing fonts, font sizes and styles. For example, you can change the line spacing, the justification of text and set tab stops. The HOME tab of the RIBBON and the Ruler at the top of the screen are used to carry out the required formats.

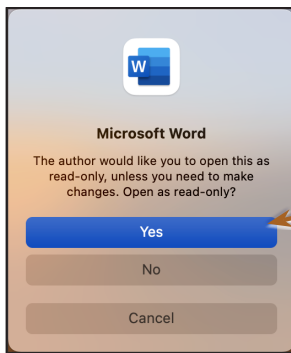

Loading a Prepared Document

Sample documents have been prepared for you to save you the time of simply typing in text. You need to load these documents from the WORD 2023 SUPPORT FILES folder.

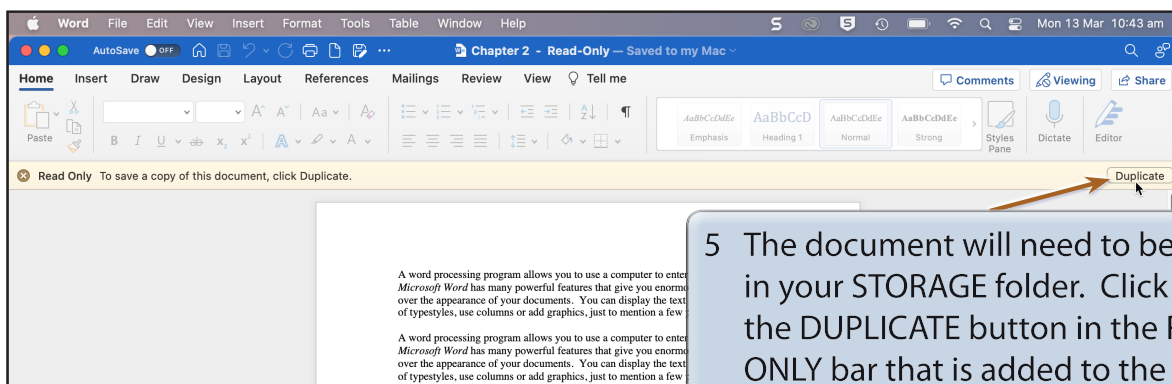

- 2 If you are continuing from a previous session, close any open documents then display the FILE menu and select OPEN.

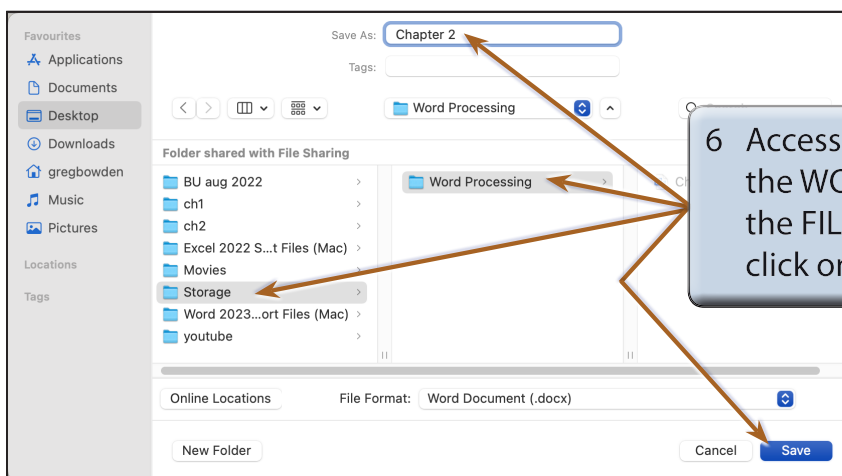

4 Select YES to open the file as a READ ONLY file.

5 The document will need to be saved in your STORAGE folder. Click on the DUPLICATE button in the READ ONLY bar that is added to the top of the document.

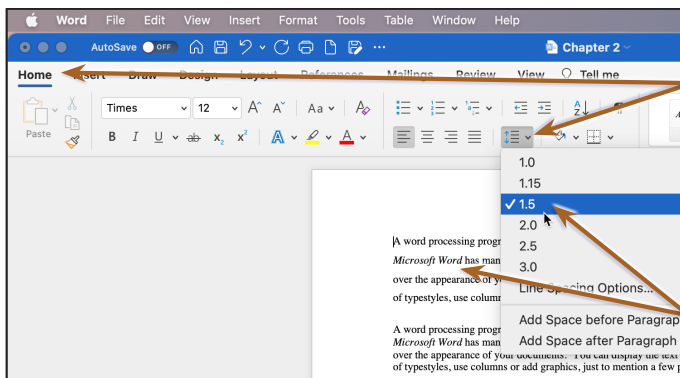

6 Access your STORAGE folder, open the WORD PROCESSING folder, leave the FILE NAME as CHAPTER 2 and click on SAVE.

NOTE: By opening the file as a READ-ONLY file you will not be able to save any changes to the file. You have to save a duplicate of the file.

Line Spacing

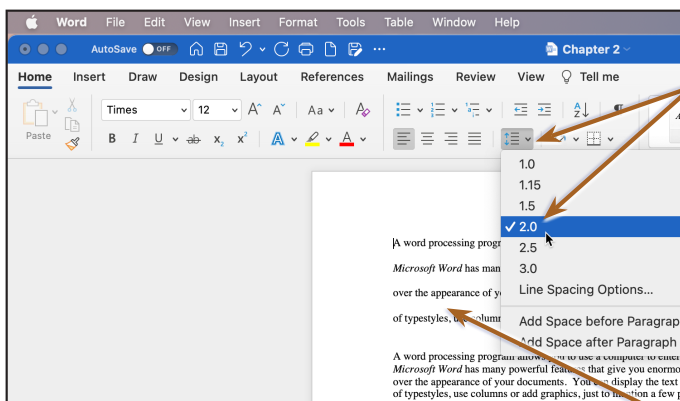

The document has two copies of the paragraph that you entered in Chapter 1. Let's change the amount of space between the lines of text.

- 1 At the moment the cursor is at the beginning of the first paragraph.

- 2 Click on the LINE AND PARAGRAPH SPACING icon in the HOME tab of the RIBBON.

- 3 Select 1.5 from the drop down list and the line spacing will be increased to one and a half lines.

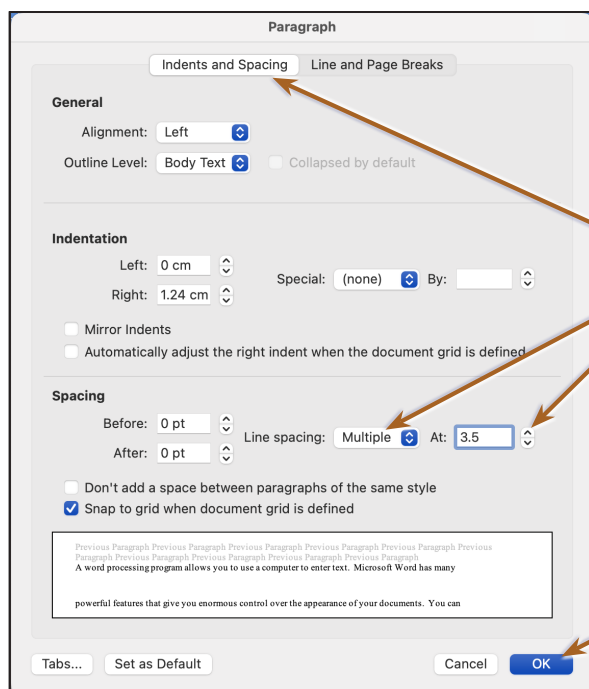

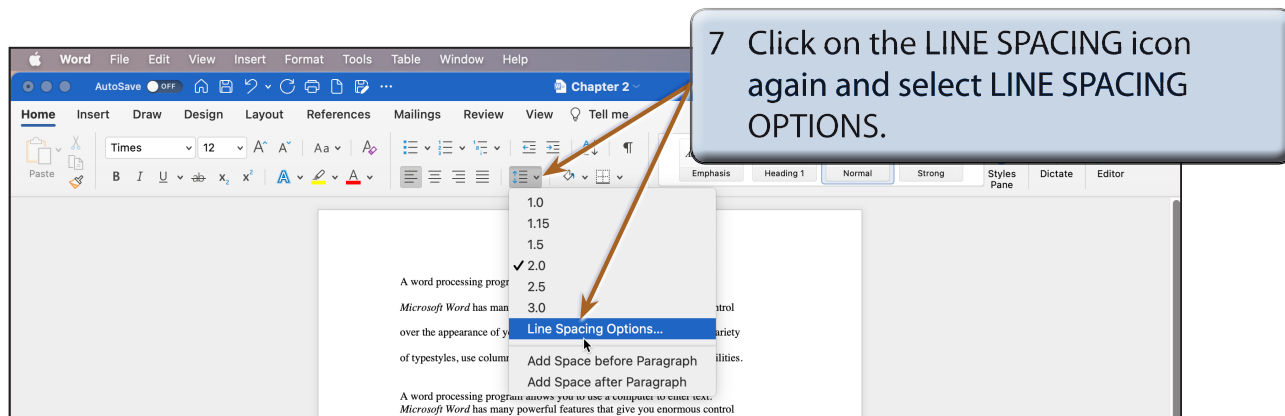

- 4 Click on the LINE SPACING icon again and select 2.0 to increase the space between the lines to double line spacing.

- 5 Just the line spacing of the first paragraph is set to a double line.

NOTE: Only the first paragraph is changed as the cursor was in that paragraph. If you wanted the spacing of both paragraphs altered, both paragraphs would need to be highlighted.

6 The LINE SPACING can also be changed using the PARAGRAPH dialogue box.

8 The INDENTS AND SPACING section of the PARAGRAPH dialogue box is opened. Set the LINE SPACING box to MULTIPLE then click once on the UP ARROW next to the AT box to set the spacing to 3.5 LINES.

9 Select OK and the spacing of the first paragraph will be increased to 3.5 lines.

NOTE: i **LINE SPACINGS** are changed by increments of 0.5 lines each time you click on the UP or DOWN arrows next to the AT box.

ii You can also display the PARAGRAPH dialogue box by displaying the **FORMAT** menu and selecting **PARAGRAPH**.

Spell Checking Documents

Microsoft Word has its own dictionary which can be used to check the spelling of any document that you enter. Using the spell checker utility is particularly useful in the proofreading process. The utility will help you correct the spelling of words by providing you with a list of words spelt similarly from the dictionary.

When you enter a word that is not in the Microsoft Word dictionary it is underlined with a 'wavy' red line. A 'wavy' blue line is used to highlight any phrases that should have their grammar checked.

- NOTE:**
- i **There are times when words are spelt correctly but are not in the program's dictionary, for example, names of places or people. In these instances you simply tell the program to IGNORE the word if it is spelt correctly, or enter the correction yourself if the spelling is not correct.**
 - ii **There are other occasions when a typing error is made, but the word that results is actually a word itself. For example, world/word, the/then, glass/gloss, etc. In these instances the dictionary will not pick up the mistake, but the grammar checker might; therefore, careful proofreading of a document is always necessary after running a spell check.**

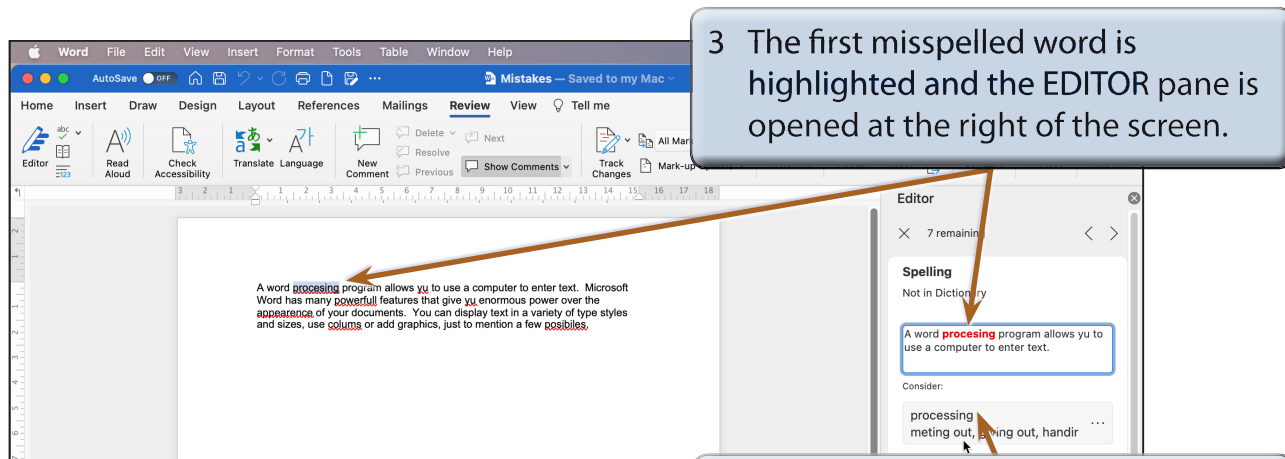

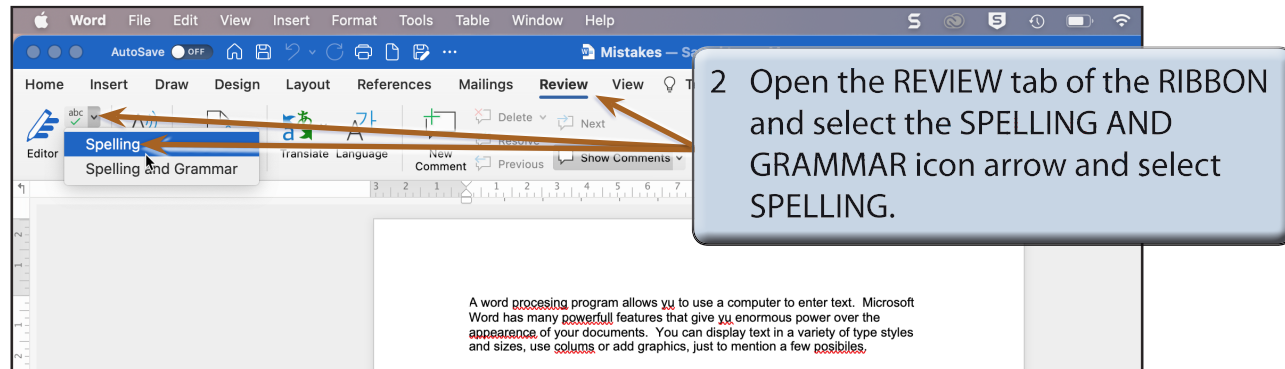

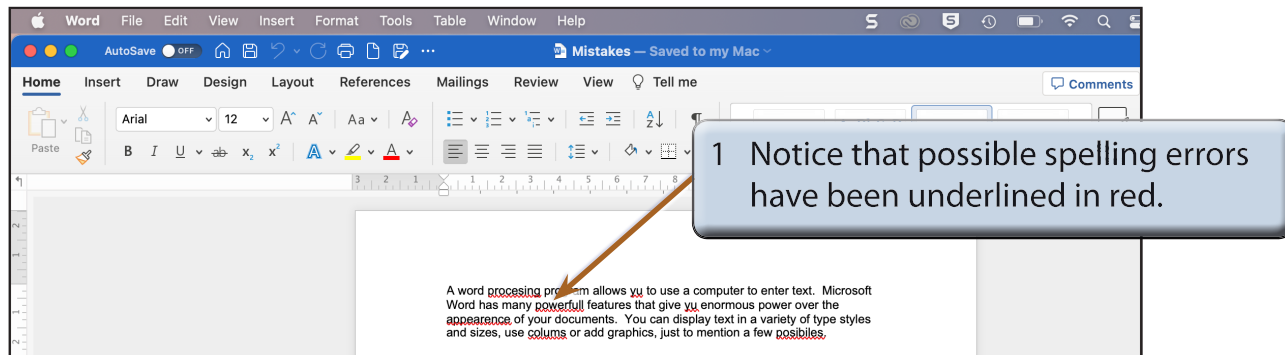

Loading a File Containing Spelling Mistakes

A document with numerous spelling mistakes has been prepared for you. It needs to be opened from the WORD 2023 SUPPORT FILES.

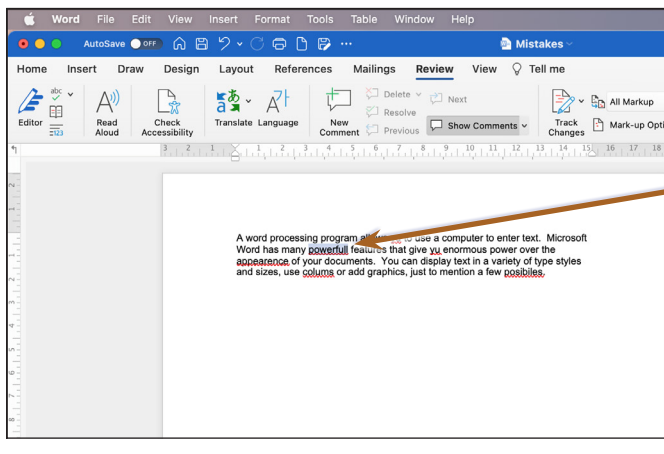

- 1 Load Microsoft Word and select OPEN or close the current file, click on the FILE menu and select OPEN.
- 2 Browse to the WORD 2023 SUPPORT FILES (refer to page 2-1 if you have forgotten how to do this).
- 3 Double click on the CHAPTER 3 folder to open that folder, then double click on the MISTAKES file to load the file and select YES to the READ-ONLY message.
- 4 Collapse the VIEWING message, click on the DUPLICATE icon below the RIBBON, access your WORD PROCESSING folder and save the document as:

Mistakes

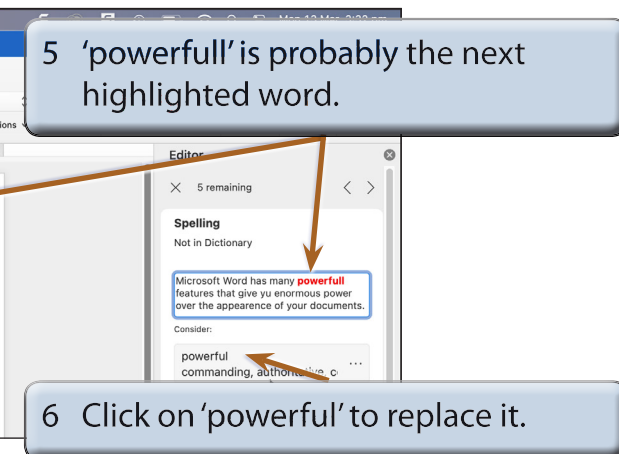

Checking the Spelling of the Document

4 Suggested words are provided in the CONSIDER frame. In this case click on the PROCESSING, which is the correct word and it will be inserted in the passage.

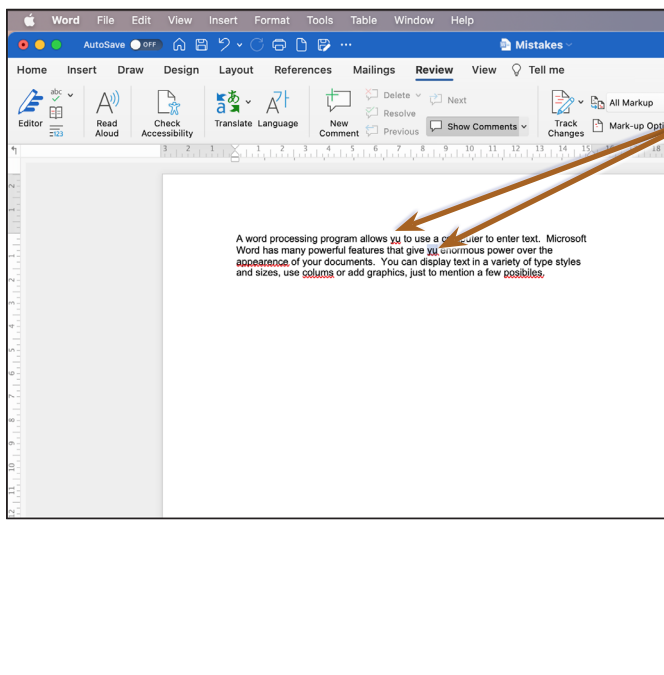

5 'powerfull' is probably the next highlighted word.

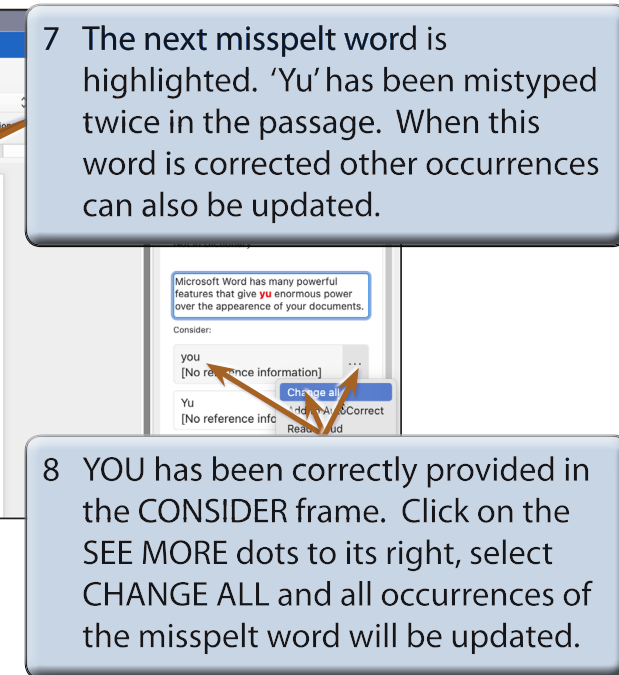

6 Click on 'powerful' to replace it.

NOTE: Microsoft Word sometimes does not highlight misspelt words in the order that they appear in the document.

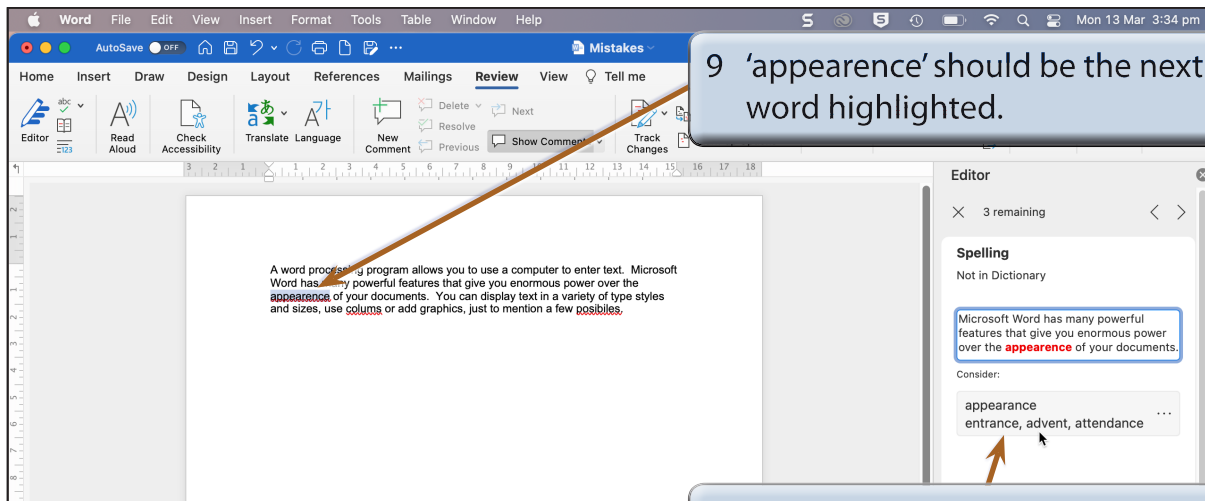

7 The next misspelt word is highlighted. 'Yu' has been mistyped twice in the passage. When this word is corrected other occurrences can also be updated.

8 YOU has been correctly provided in the CONSIDER frame. Click on the SEE MORE dots to its right, select CHANGE ALL and all occurrences of the misspelt word will be updated.

- NOTE:**
- i If you think that you may have misspelt or mistyped the same word in a passage, use **CHANGE ALL** instead of clicking on the suggestion.
 - ii There are other options provided next to words in the **CONSIDER** frame. Such as having the suggestion read out to you or spelt out.

The screenshot shows the Microsoft Word 365 interface with the 'Review' tab selected. The 'Editor' pane on the right shows a spelling correction for the word 'appearance'. The word is highlighted in red in the document text. The 'Editor' pane shows the word 'appearance' is 'Not in Dictionary' and suggests 'entrance, advent, attendance' as alternatives. An orange arrow points from the word in the document to the suggestion box.

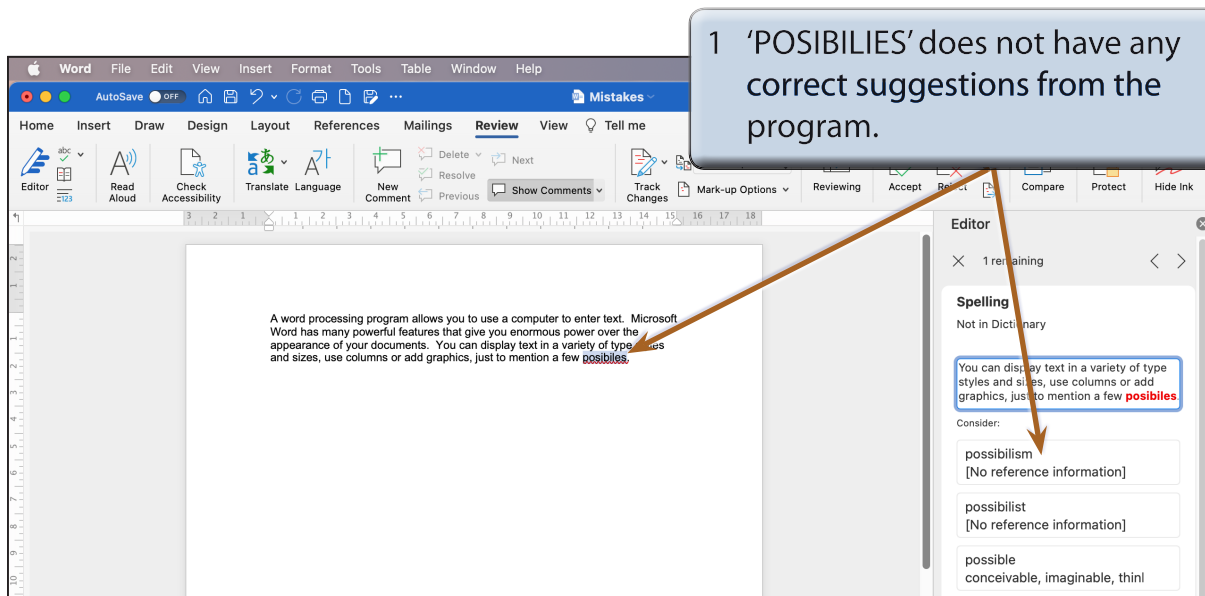

9 'appearance' should be the next word highlighted.

10 'appearence' should be spelt 'appearance' which should be provided in the CONSIDER box, so select it.

11 Change 'coluns' to 'columns'.

Manually Changing Words

There are times when the dictionary cannot suggest any words. 'POSIBILES' is an example of this. In this case you need to enter more of the word manually to help the program find the correct word.

The screenshot shows the Microsoft Word 365 interface with the 'Review' tab selected. The 'Editor' pane on the right shows a spelling correction for the word 'posibles'. The word is highlighted in red in the document text. The 'Editor' pane shows the word 'posibles' is 'Not in Dictionary' and suggests 'possibilism', 'possibilist', and 'possible' as alternatives. An orange arrow points from the word in the document to the suggestion box.

1 'POSIBILES' does not have any correct suggestions from the program.

Moving Text

It is important to be able to move text efficiently within a page, between pages and between documents. In this chapter you will learn how to scroll through a document, insert page breaks, copy, cut and paste text both within and between documents, and use drag and drop techniques.

Cursor Movements

When you are using large documents (2 pages or more), it is very important to be able to move through the file very quickly.

A Loading a Sample Document

A sample document has been prepared for you which needs to be opened from the WORD 2023 SUPPORT FILES.

- 1 Load Microsoft Word and click on OPEN or close the current file, display the FILE menu and select OPEN.
- 2 Access the WORD 2023 SUPPORT FILES (refer to page 2-1 if you have forgotten how to do this).
- 3 Double click on the CHAPTER 4 folder to open that folder, then double click on the CHAPTER 4 file to load the file.
- 4 Select YES to open the file as a READ-ONLY document, collapse the VIEWING tab then select DUPLICATE and save the document in your WORD PROCESSING folder as:

Chapter 4
- 5 The document contains 10 copies of the paragraph you have used in previous chapters.

B The Scroll Bars

1 At the moment the cursor will be at the beginning of the document.

2 At the bottom of the screen 'Page 1 of 3' is displayed in the STATUS BAR telling you which page is currently on the screen.

The screenshot shows the Microsoft Word interface with the 'Home' tab selected. The document is titled 'Chapter 4 - Saved to my Mac'. The status bar at the bottom displays 'Page 1 of 3', '572 words', 'English (United States)', and 'Accessibility: Good to go'. The document content includes three identical paragraphs, each preceded by 'COPY 1', 'COPY 2', and 'COPY 3' respectively. A callout box with an arrow points to the top of the document, indicating the cursor's position at the beginning.

3 Drag the VERTICAL SCROLL BOX at the top right of the screen to about half way down the VERTICAL SCROLL BAR.

4 The screen now displays part of page 2 and the STATUS BAR displays PAGE 2 of 3.

The screenshot shows the Microsoft Word interface with the 'Home' tab selected. The document is titled 'Chapter 4 - Saved to my Mac'. The status bar at the bottom displays 'Page 2 of 3', '2 words', 'English (United States)', and 'Accessibility: Good to go'. The document content includes two paragraphs, each preceded by 'COPY 5' and 'COPY 6' respectively. A callout box with an arrow points to the vertical scroll bar on the right side of the window, indicating the action of dragging the scroll box to navigate to page 2.

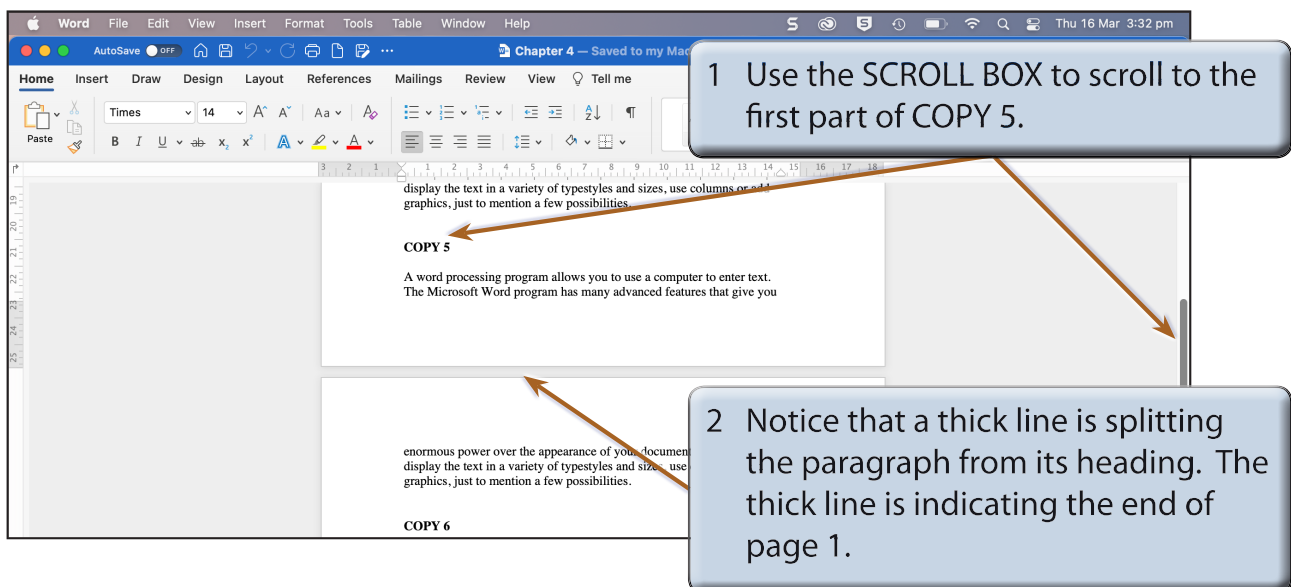

- 5 Return the screen to the beginning of the document by dragging the VERTICAL SCROLL BOX to the top of the VERTICAL SCROLL BAR.
- 6 You can also use the UP and DOWN arrows on the keyboard to scroll forwards or backwards through the document.

NOTE:

- i The PAGE DOWN key on the keyboard can be used to scroll half a page down at a time. Holding down the COMMAND key and pressing the PAGE DOWN key scrolls the document to the next page.
- ii The PAGE UP key on the keyboard can be used to scroll half a page up at a time. Holding down the COMMAND key and pressing the PAGE UP key scrolls the document to the previous page.

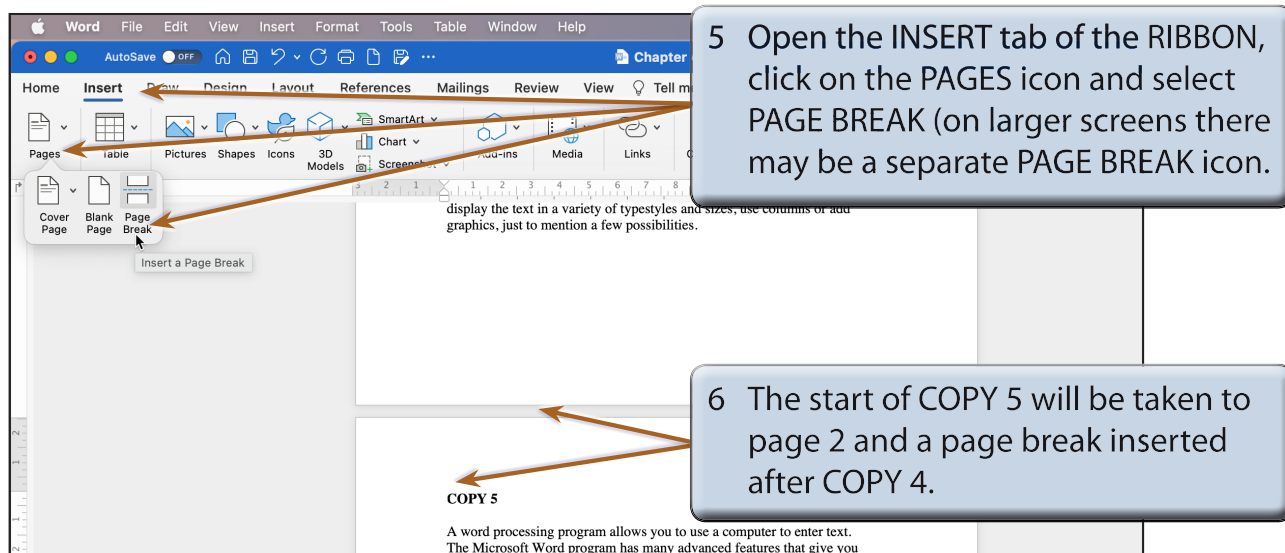

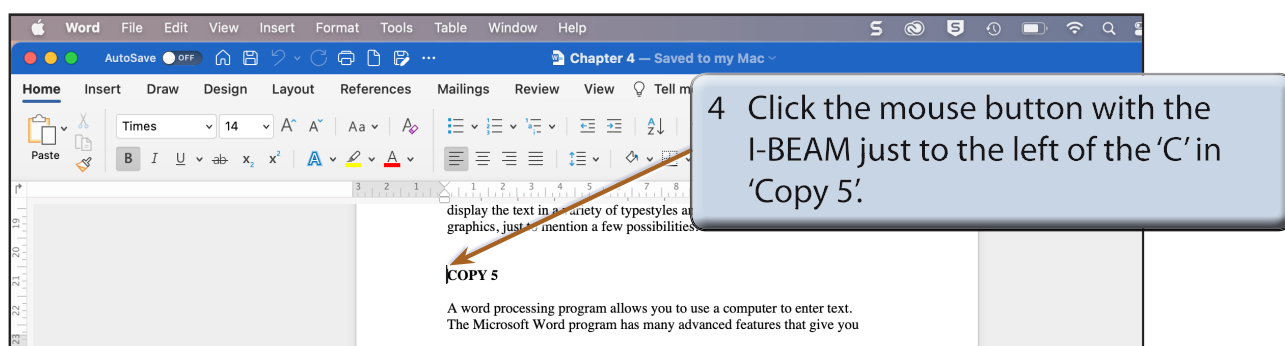

Inserting Page Breaks

PAGE BREAKS can be used to move text to the top of the next page. They are used to ensure that paragraphs or headings start at the top of a fresh page.

- NOTE:**
- i If you were to print with the present setup, part of COPY 5 would be on page 1 and the remainder on page 2.
 - ii The page break may be in a slightly different position depending on the computer system you are using.

3 It would look far better to have the page break at the beginning of COPY 5.

- NOTE:**
- i COMMAND+<return> can also be pressed to insert a page break.
 - ii Never use the <return> key to add blank lines to move text to the next page. If you do this, when you add or remove lines to the previous page the text on the next page will be moved.

Find and Replace

Words or phrases in a document can be found and replaced with other words or phrases.

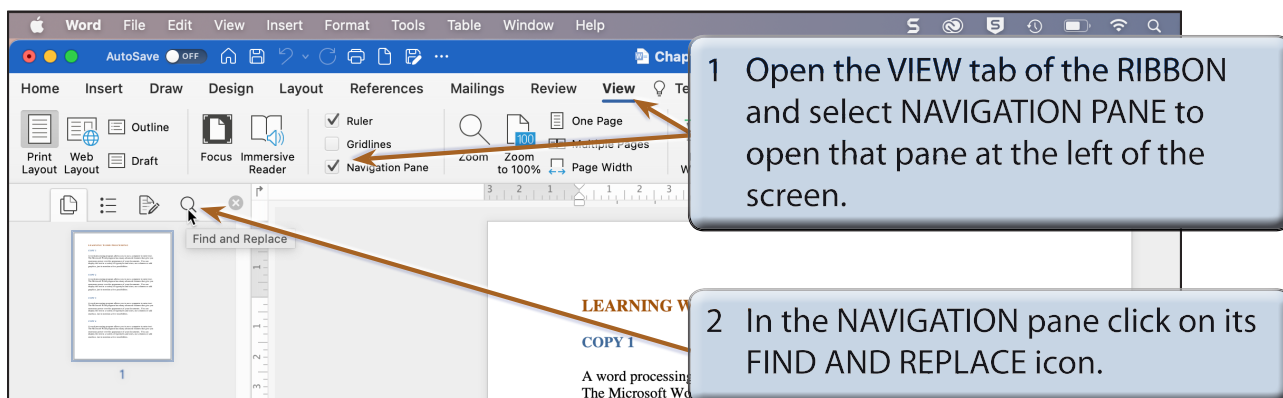

Loading a Sample Document

A sample document has been prepared for you which needs to be opened from the WORD 2023 SUPPORT FILES.

- 1 Load Microsoft Word and click on OPEN or close the current file, display the FILE menu and select OPEN.
- 2 Access the WORD 2023 SUPPORT FILES, double click on the CHAPTER 5 folder to open that folder, then double click on the CHAPTER 5 file to load the file.
- 3 Select YES to open the file as a READ ONLY document, collapse the VIEWING message, select DUPLICATE and save the document in your WORD PROCESSING folder.
- 4 The file contains 6 copies of the paragraph you have used in previous chapters.

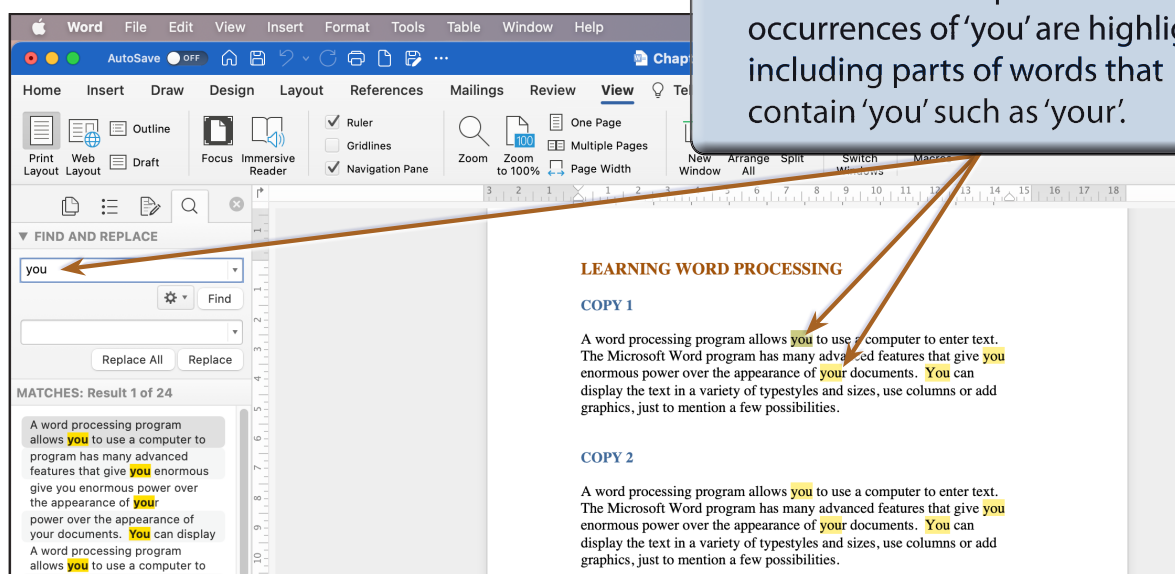

Finding Text

The FIND command allows you to locate specific words or phrases in a document. It is particularly useful when working with long documents.

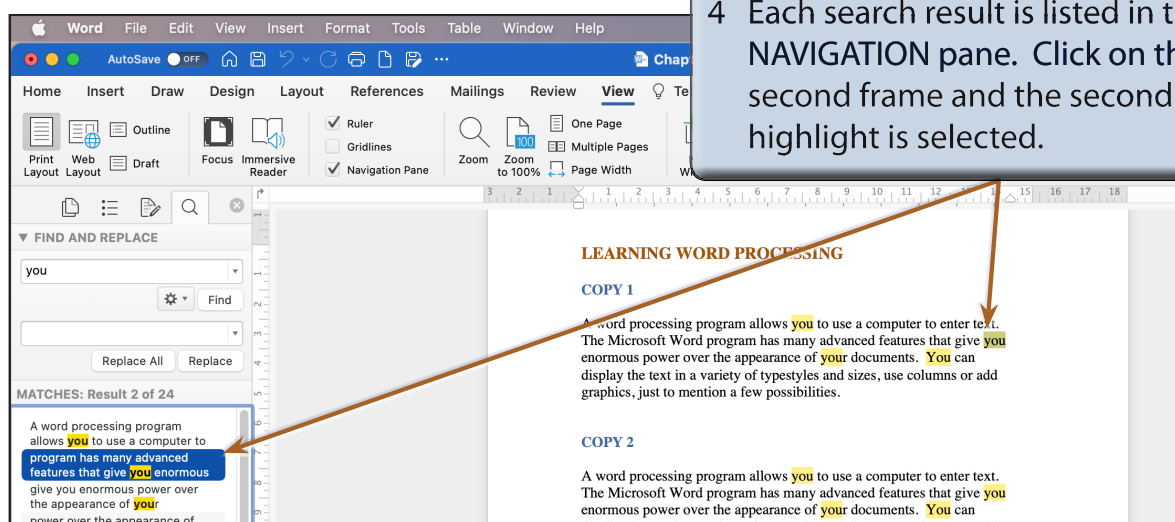

NOTE: You can also display the EDIT menu, highlight FIND and select REPLACE to open the FIND AND REPLACE section of the NAVIGATION pane.

3 Enter: you in the SEARCH box of the NAVIGATION pane and all the occurrences of 'you' are highlighted including parts of words that contain 'you' such as 'your'.

4 Each search result is listed in the NAVIGATION pane. Click on the second frame and the second highlight is selected.

- NOTE:**
- i The current found item is highlighted in OLIVE, the next or previous found items are highlighted in YELLOW.
 - ii The NAVIGATION pane is also called the SIDEBAR.

Margins and Indents

Page Margins

Page Margins are the space between the edge of the paper and where your text is printed. They allow you to control where your text is printed on a page. All printers require a certain amount of space from the edge of the paper to where the printing starts and documents would not look very professional if they started very close to the edge of the paper. The following diagram shows the position of the page margins.

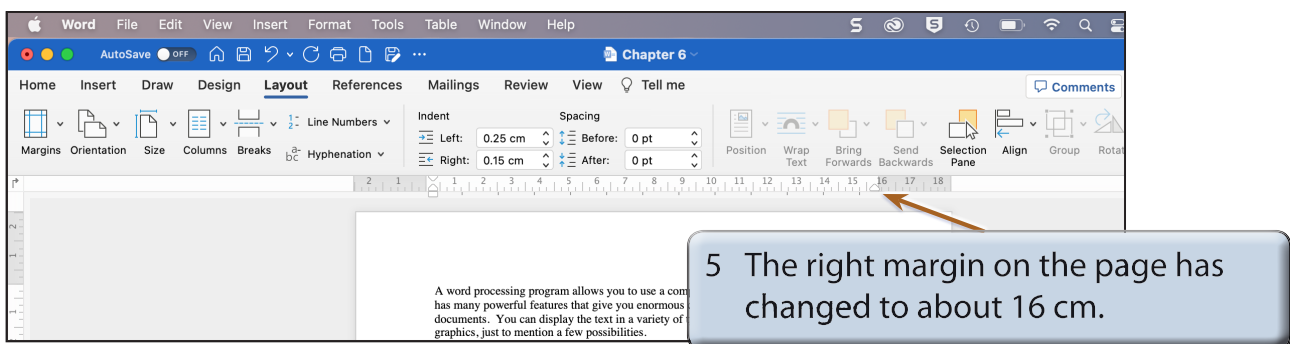

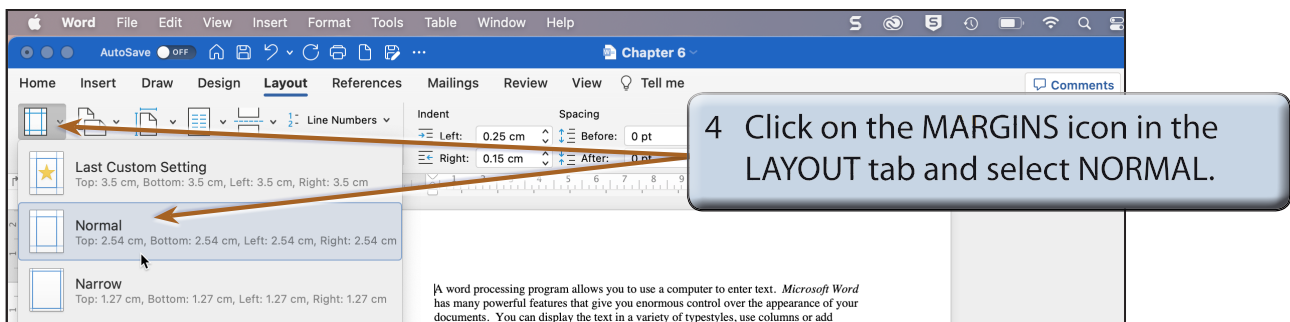

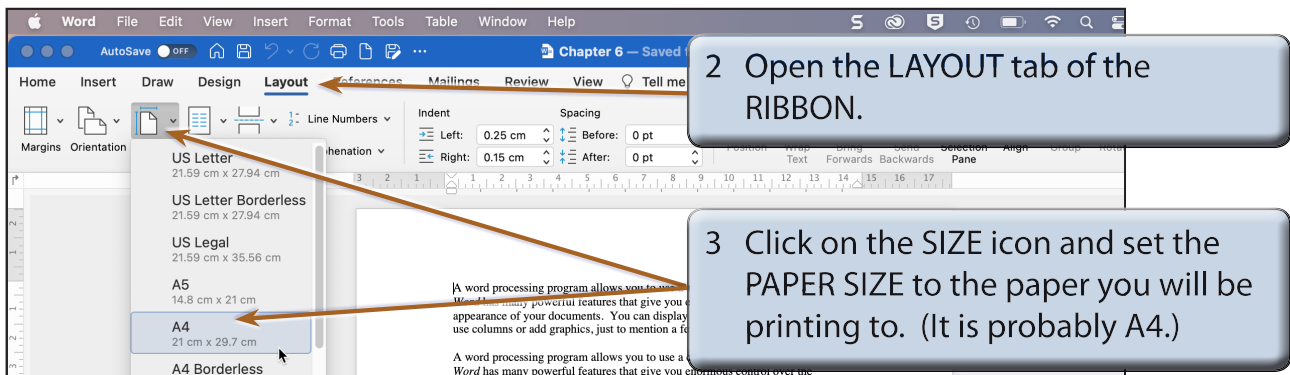

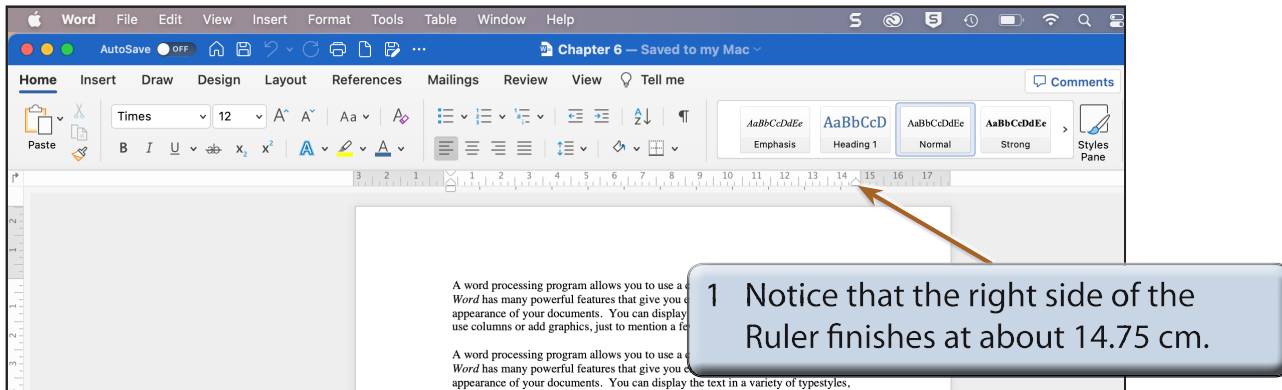

When your document is set to A4 paper, Microsoft Word sets the TOP, BOTTOM, LEFT and RIGHT margins to 2.54 cm (1 inch). These settings can be adjusted as required, but it is unwise to set margins below 1.5 cm. There are two ways to alter page margins, using the LAYOUT tab of the RIBBON or by using the RULER.

Loading a Sample Document

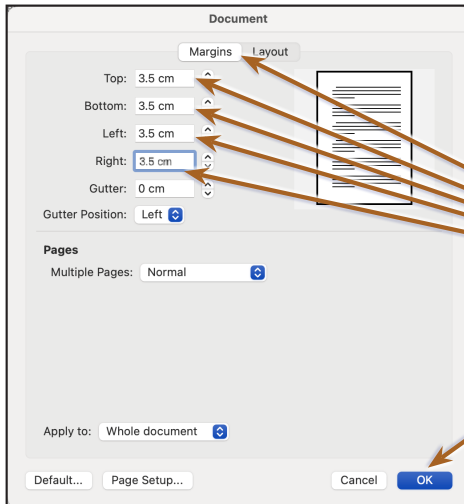

A sample document has been prepared for you which needs to be loaded from the WORD 2023 SUPPORT FILES.

- 1 Load Microsoft Word and click on OPEN or close the current file and select OPEN from the FILE menu.
- 2 Access the WORD 2023 SUPPORT FILES, double click on the CHAPTER 6 folder to open that folder, then double click on the CHAPTER 6 file to load the file.
- 3 Select YES to open the file as a READ ONLY document, collapse the VIEWING message then select DUPLICATE and save the document in your WORD PROCESSING folder.

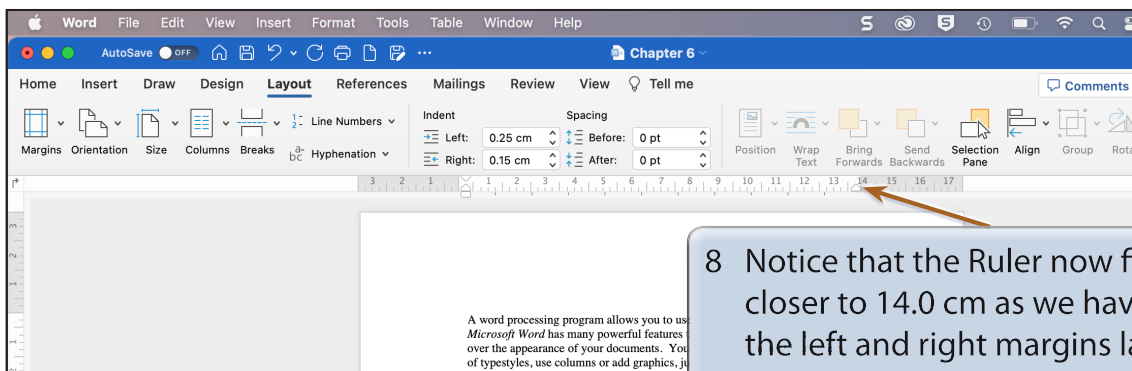

Changing Margins Using Page Setup

- 6 You can set custom margins when required. Display the FORMAT menu and select DOCUMENT.

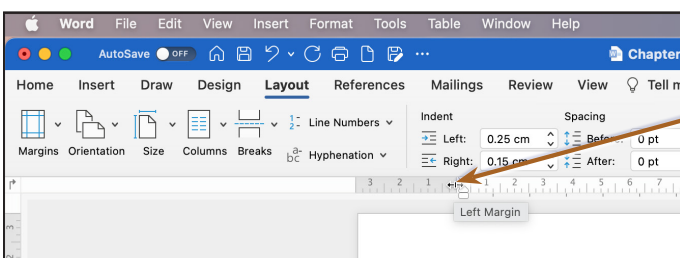

- 7 In the MARGINS section of the DOCUMENT dialogue box change the TOP, BOTTOM, LEFT and RIGHT margins to 3.5 cm, and select OK.

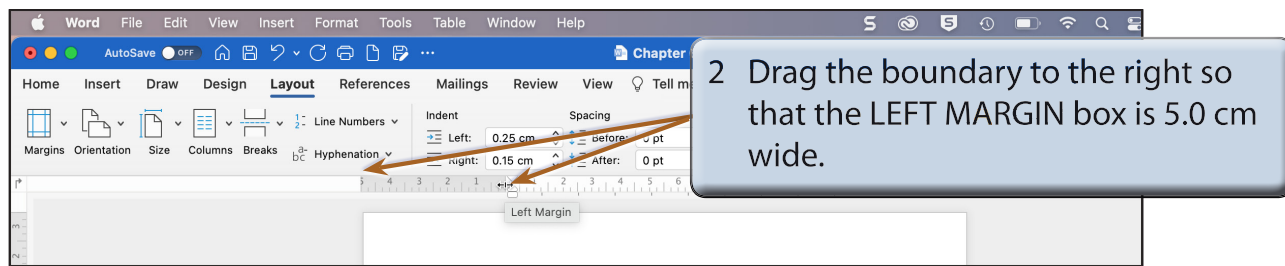

- 8 Notice that the Ruler now finishes closer to 14.0 cm as we have made the left and right margins larger and reduced the print area.

Manually Adjusting Page Margins Using the Ruler

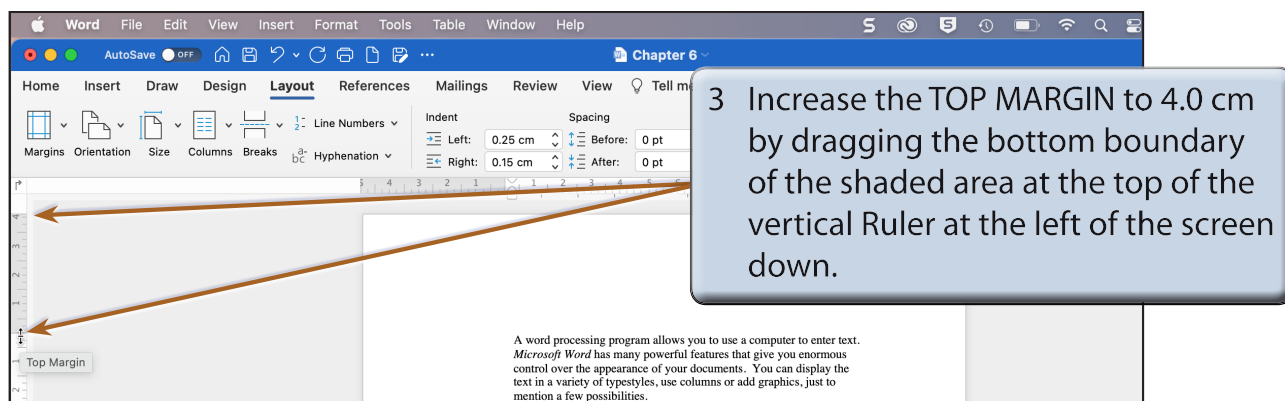

You can adjust the margins directly on the screen using the Ruler.

- 1 Move the pointer over the right boundary of the left shaded area in the Ruler, which is the LEFT MARGIN. The pointer changes to a horizontal arrowed line.

- NOTE:**
- i This has increased the LEFT MARGIN to about 5.0 cm from the left edge of the paper.
 - ii The INDENT markers at the left of the Ruler have been moved to the right slightly in this document to make it easier to move the boundary of the LEFT MARGIN box.

- NOTE:**
- i The RIGHT and BOTTOM margins can be adjusted in the same way using the RIGHT MARGIN box at the right of the top Ruler and the BOTTOM MARGIN box at the bottom of the vertical Ruler.
 - ii If you hold down the OPTION key as you drag the margin boundaries, the measurements will be displayed.

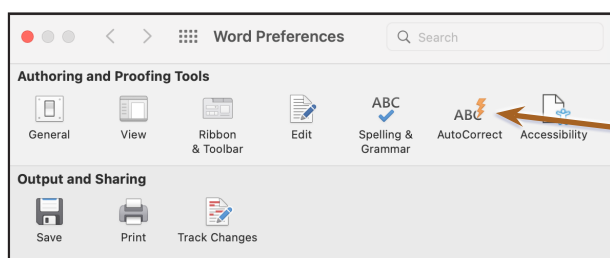

Bulleted and Numbered Lists

One of the applications of hanging indents is the creation of bulleted or numbered lists. Microsoft Word has automated the process to make the creating of these lists very easy. To illustrate this, let's create an advertisement for a new car.

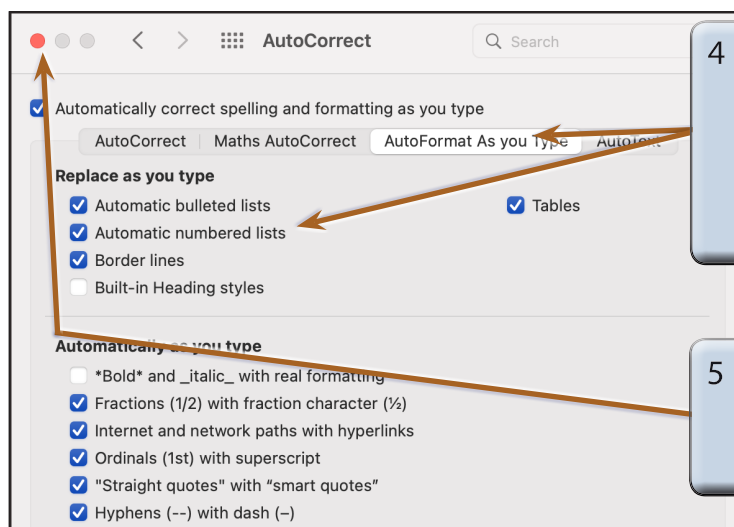

Turning on Automated Lists

The automated list option may already be turned on, but it is easy to check.

- 1 Load Microsoft Word or close the current file and start a NEW DOCUMENT.
- 2 Display the WORD menu and select PREFERENCES.

- 3 Select the AUTOCORRECT icon in the WORD PREFERENCES dialogue box.

- 4 Click on the AUTOFORMAT AS YOU TYPE tab and check that AUTOMATIC BULLETED LISTS and AUTOMATIC NUMBERED LISTS are turned on.

- 5 Click on the red CLOSE button to close the WORD PREFERENCES dialogue box.

NOTE: The AUTOCORRECT dialogue box can be used to turn these options off if you decide later that you prefer not to use them.

Entering the Headings

The title of the advertisement and a sentence describing the product will be entered first.

1 Enter:

Fasten Your Seat Belts

<return>

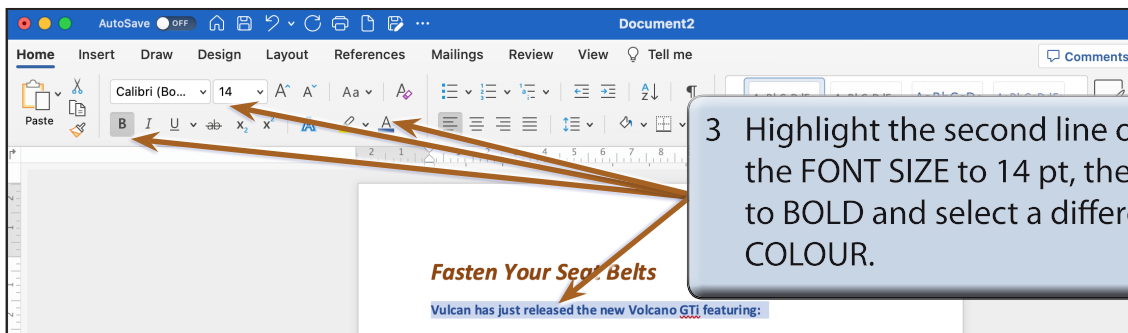

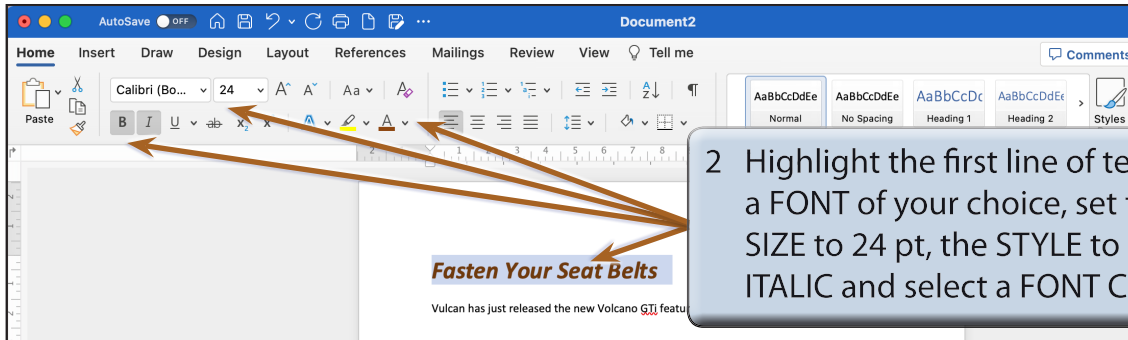

<return>

Vulcan has just released the new Volcano GTi featuring:

<return>

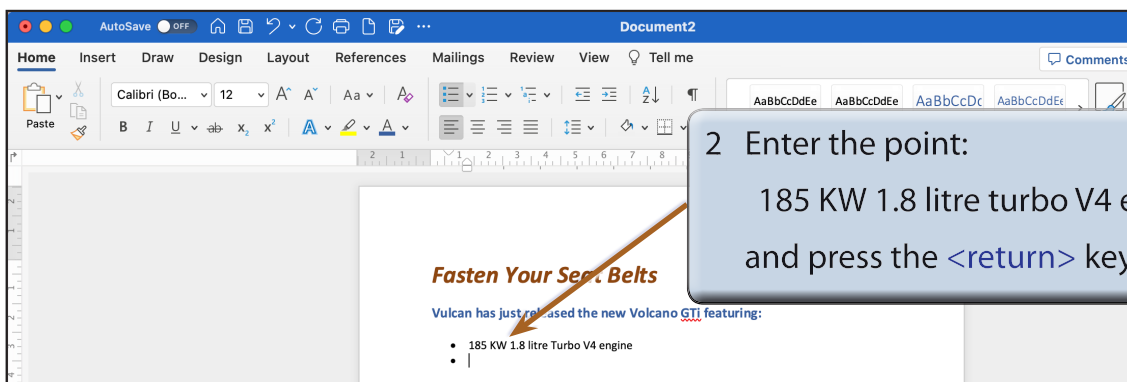

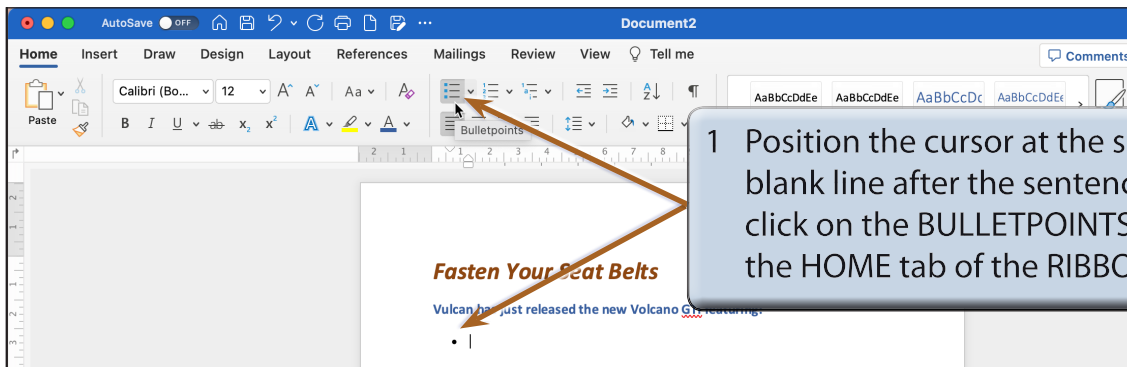

<return>

<return>

Entering the Points

Bulleted points will be used to highlight the features of the car.

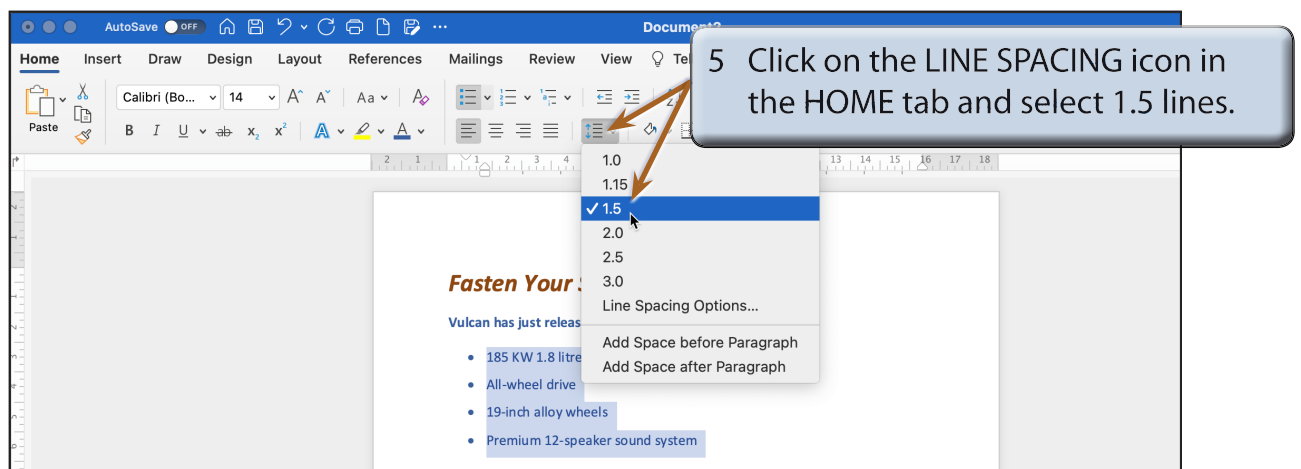

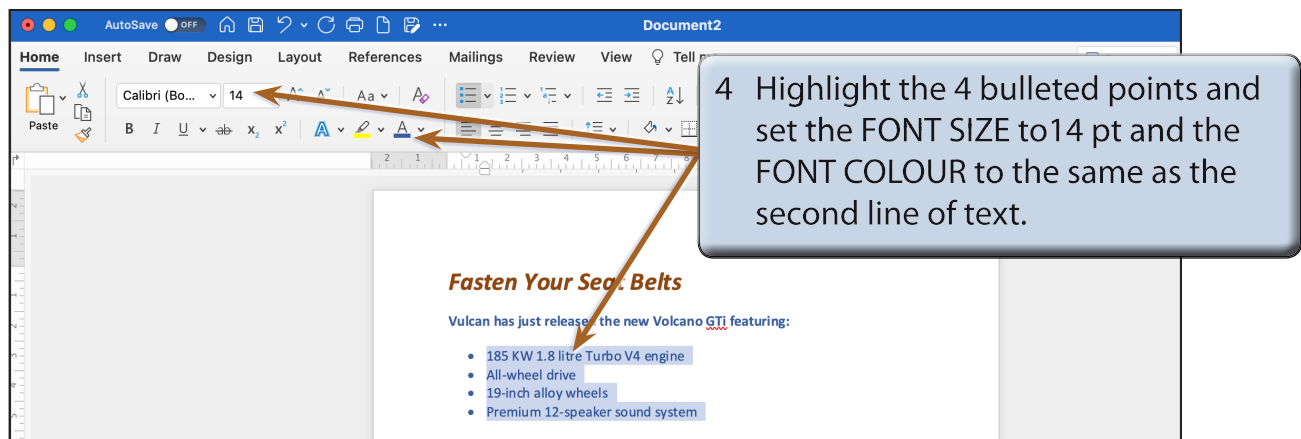

NOTE: The bullet character may be different on your computer depending on who has used bullet points before you.

3 Enter the next 3 points:

All-wheel drive <return>

19-inch alloy wheels <return>

Premium 12-speaker sound system

- NOTE:**
- i Setting the line spacing to 1.5 lines is another way of adding half line spacing between the points.
 - ii Notice that the automatic bullets have set the indents in the Ruler to hanging indents.
 - iii When entering bullets, pressing the <return> key twice turns the bullets off.

Headers, Footers and Footnotes

In this chapter you will learn how to format multiple pages in more detail. This includes adding Headers and Footers, Title Pages and Footnotes.

Headers and Footers

Document pages provide space at the top and bottom for HEADERS and FOOTERS. Anything placed in a HEADER or FOOTER is usually printed on each page of a document. HEADERS and FOOTERS are very useful for adding a standard heading, page numbers, an author's name, the date and so on, to a document.

A Loading the Prepared Document

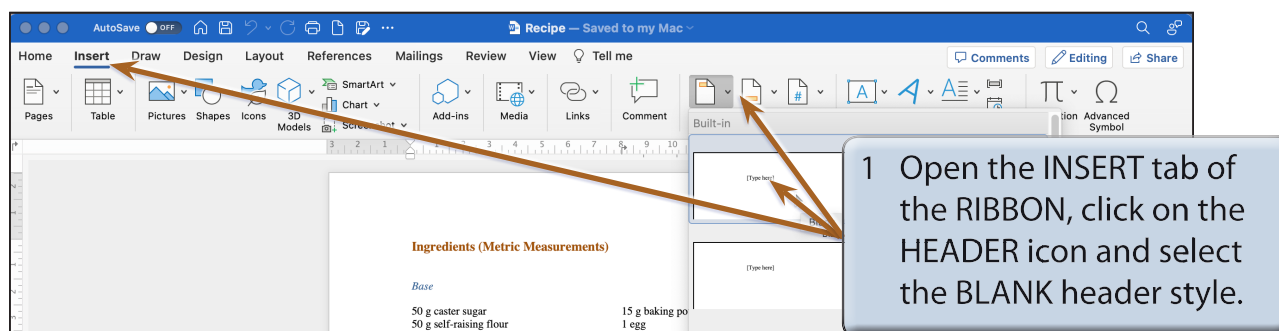

A sample document about a cooking recipe has been prepared for you and will need to be loaded from the WORD 2023 SUPPORT FILES.

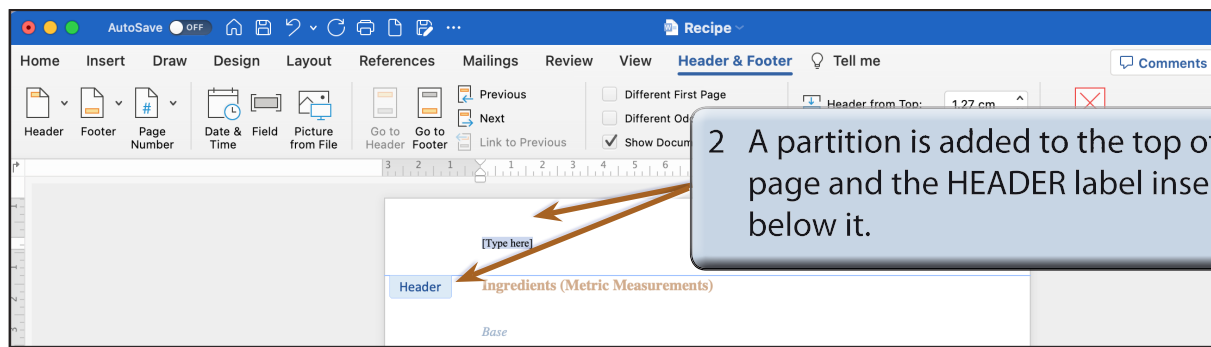

- 1 Load Microsoft Word and click on OPEN or close the current file and select OPEN from the FILE menu.
- 2 Navigate to the WORD 2023 SUPPORT FILES, open the CHAPTER 8 folder and load the RECIPE file.
- 3 Select YES to open the file as a READ ONLY document, collapse the VIEWING message and DUPLICATE the document in your WORD PROCESSING folder as:

Recipe

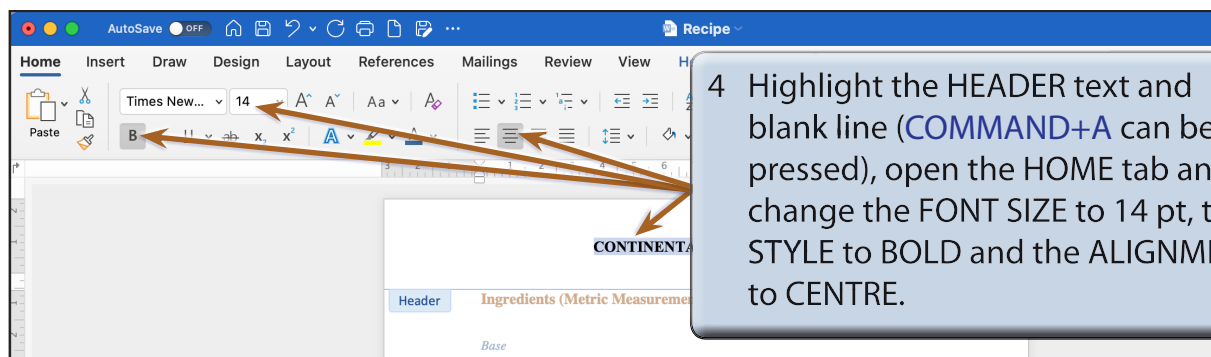

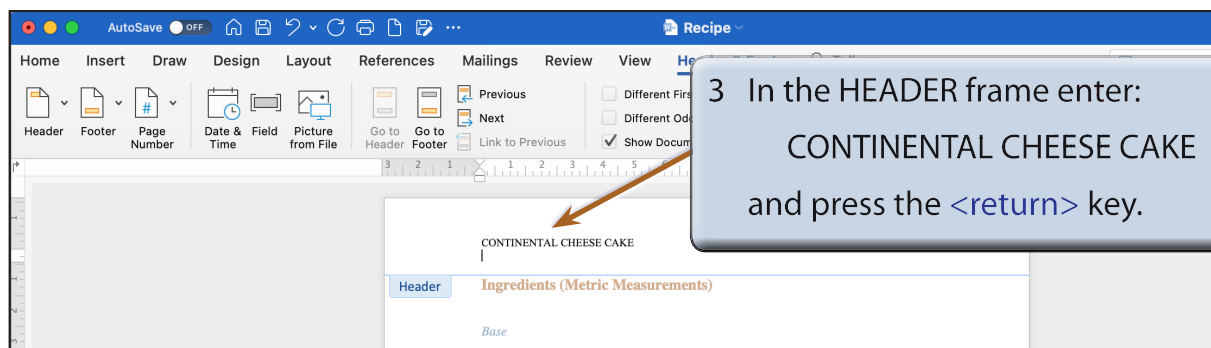

B Inserting a Header

Let's place a page title as a HEADER.

NOTE: The HEADER & FOOTER tab containing all the header and footer commands is added to the RIBBON.

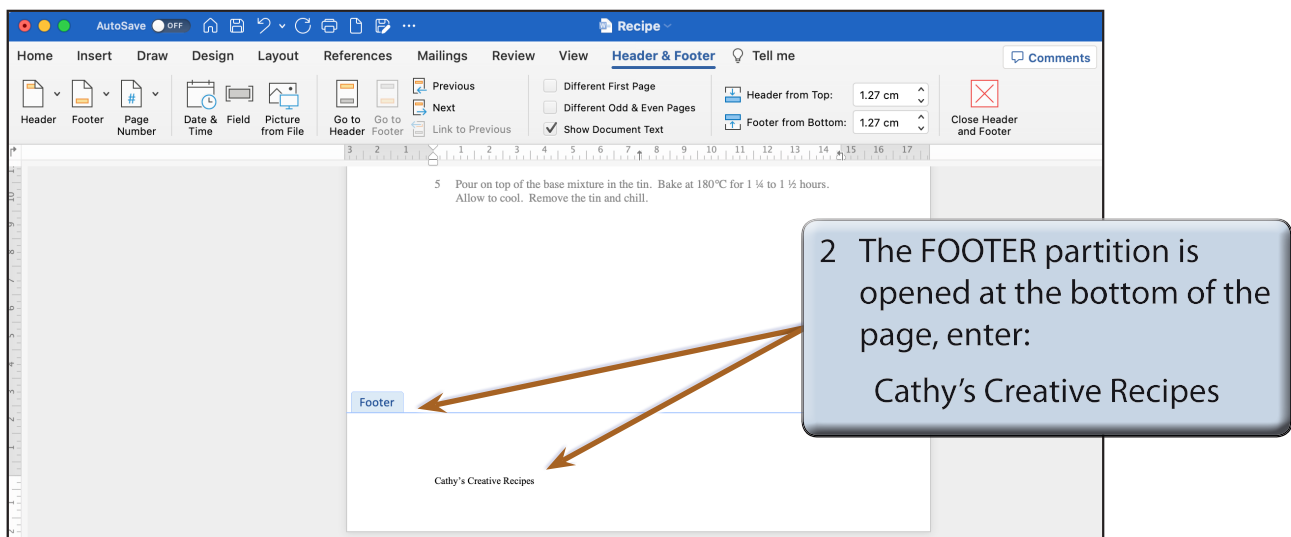

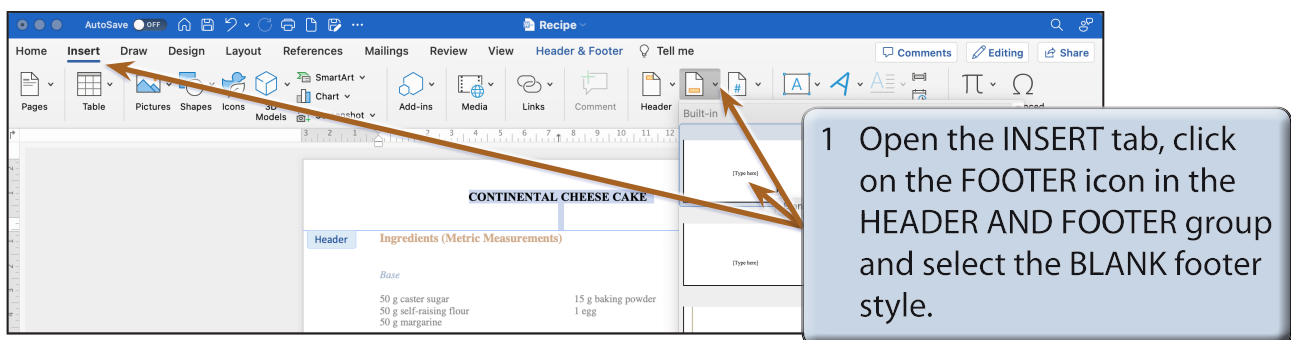

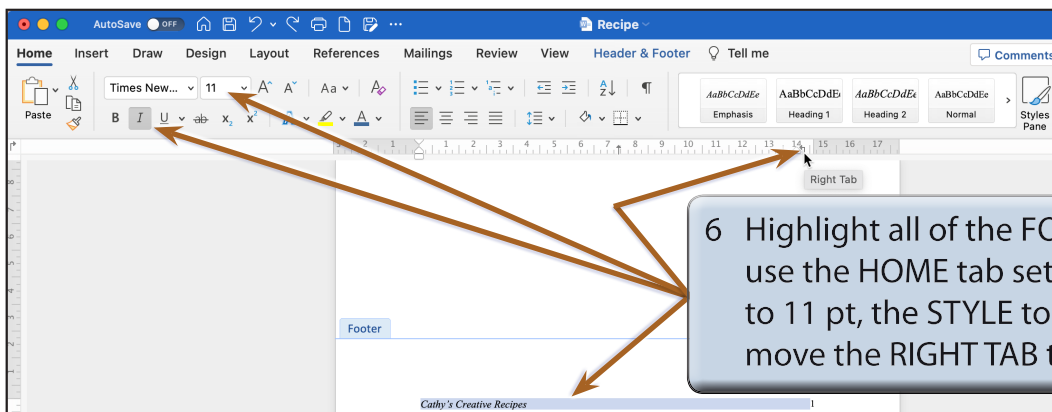

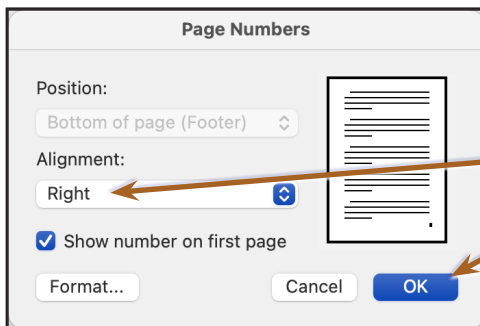

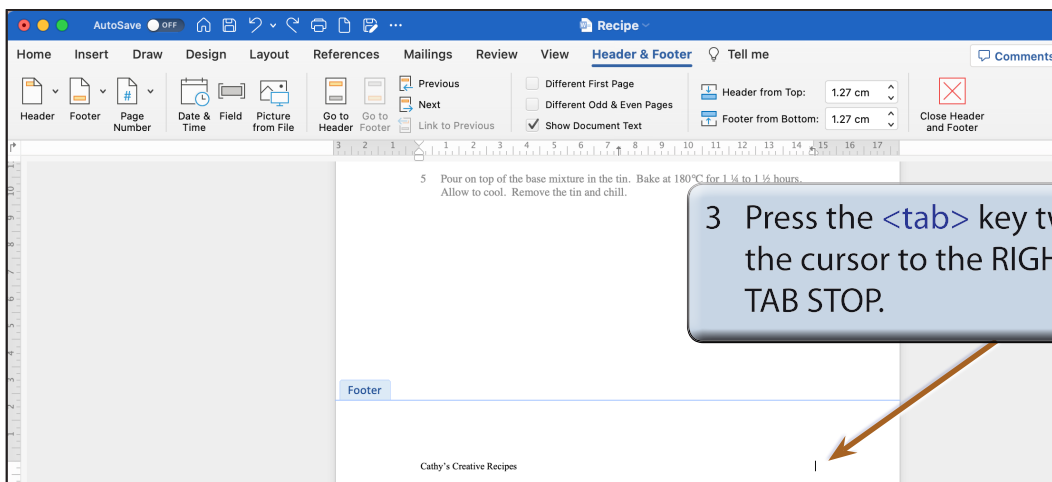

NOTE: When you insert HEADERS and/or FOOTERS the screen is set to a separate view. You cannot edit the normal document when the HEADER AND FOOTER view is open.

- NOTE:**
- i The HEADER and FOOTER frames have preset tabs stops inserted. A CENTRE JUSTIFIED TAB STOP is at the centre of the left and right margins, in this case at 7.3 cm and a RIGHT JUSTIFIED TAB STOP is at the right margin, in this case at 14.6 cm.
 - ii The HEADER frame increases in size as you enter more lines of text or press the <return> key.

C Inserting a Footer

A partition is available at the bottom of each page. This is called the FOOTER and it prints on each page. Let's place the title of the recipe book at the left of the FOOTER and the page number at the right.

Placing Text in Columns

When entering a page of text it is sometimes advantageous to place that text in columns. This can make the passage easier to read and utilise the space available on a page more efficiently. Microsoft Word allows you to split the page into up to 11 columns, each having its own margins, indents, justifications and widths. Normally, however, 2 or 3 columns are used.

Loading a Prepared Article

An article about Japan has been entered for you. It will need to be converted into columns.

- 1 Load Microsoft Word and click on OPEN or close the current file and select OPEN from the FILE menu.
- 2 Navigate to the WORD 2023 SUPPORT FILES, open the CHAPTER 9 folder and load the COLUMNS file.
- 3 Select YES to open the file as a READ ONLY document, collapse the VIEWING message and DUPLICATE the document in your WORD PROCESSING folder as:

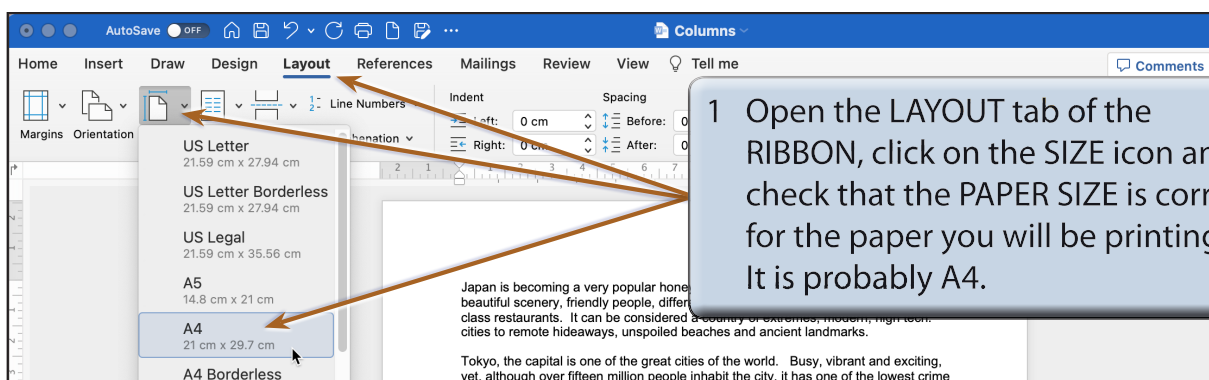

Columns

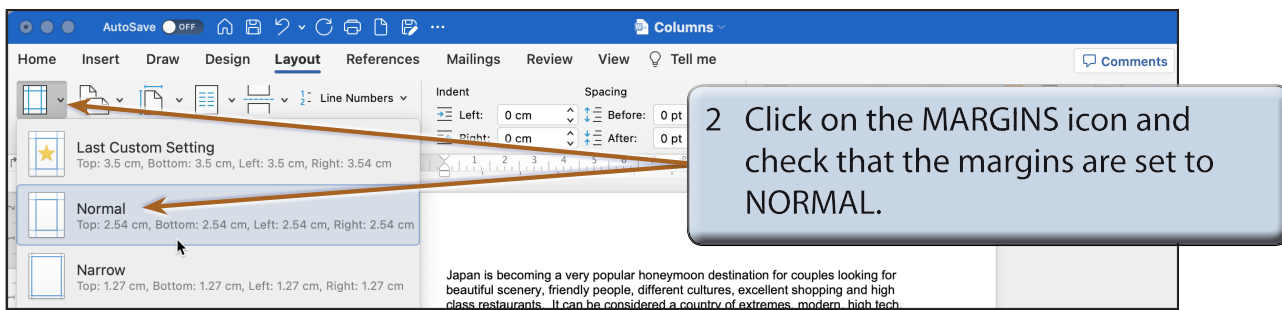

Setting Text into Two Columns

As it is at the moment, the text is a little boring to read. Placing it in two columns can make it much more interesting.

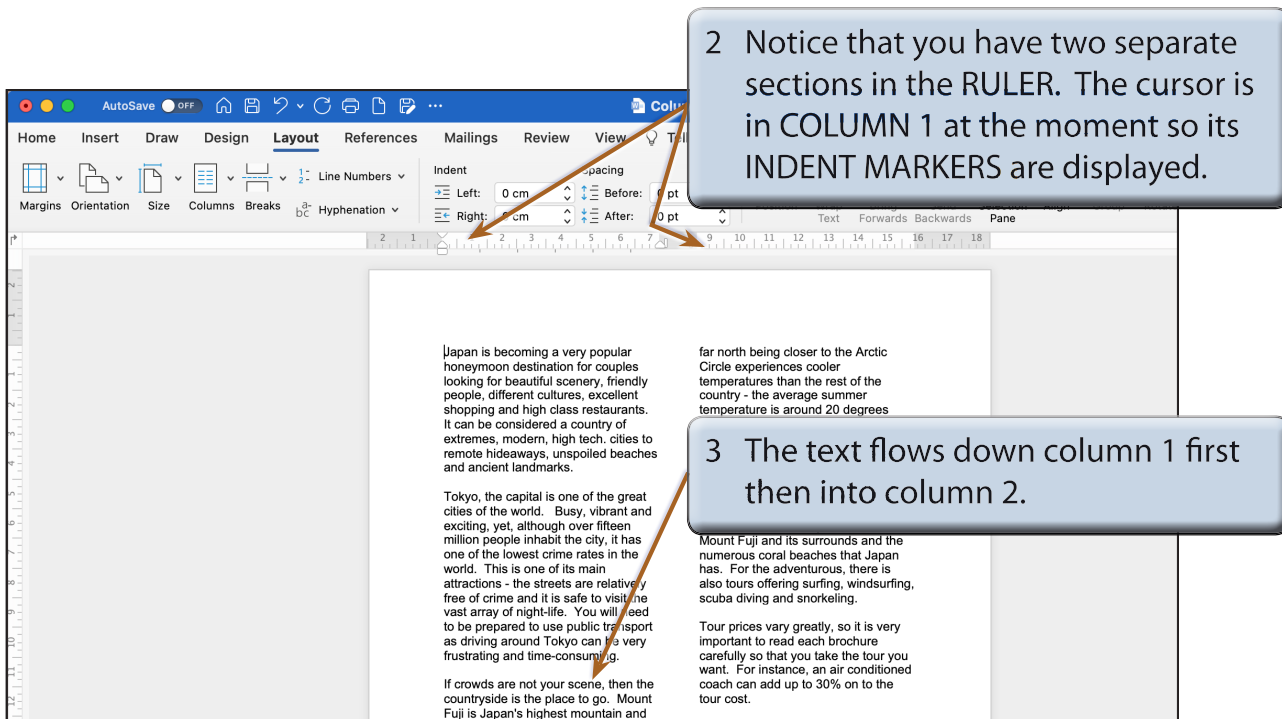

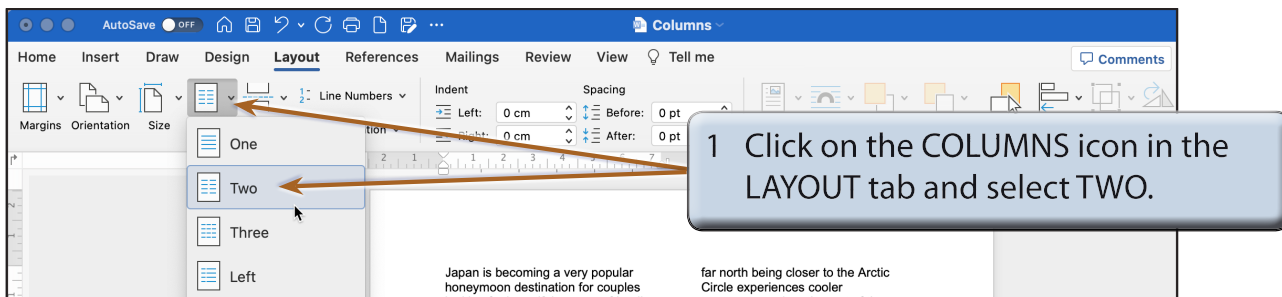

A Preliminary Settings

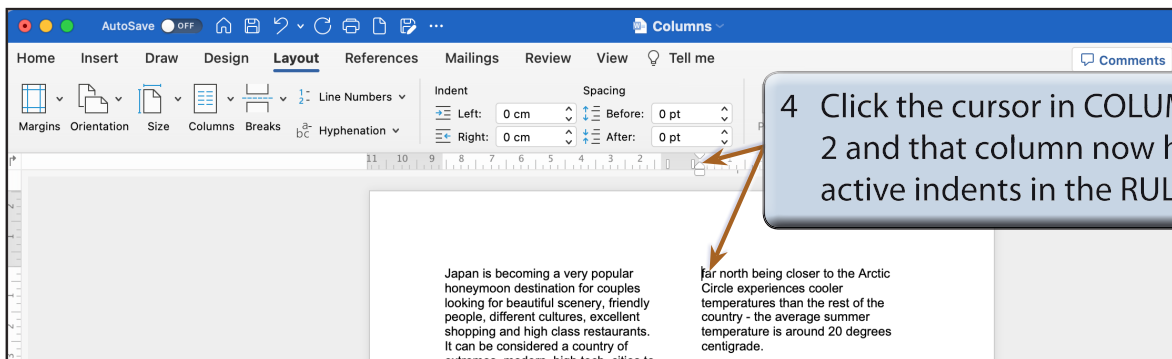

Before placing text in columns you should check that the PAGE SETUP is correct for your system.

B Setting the Columns

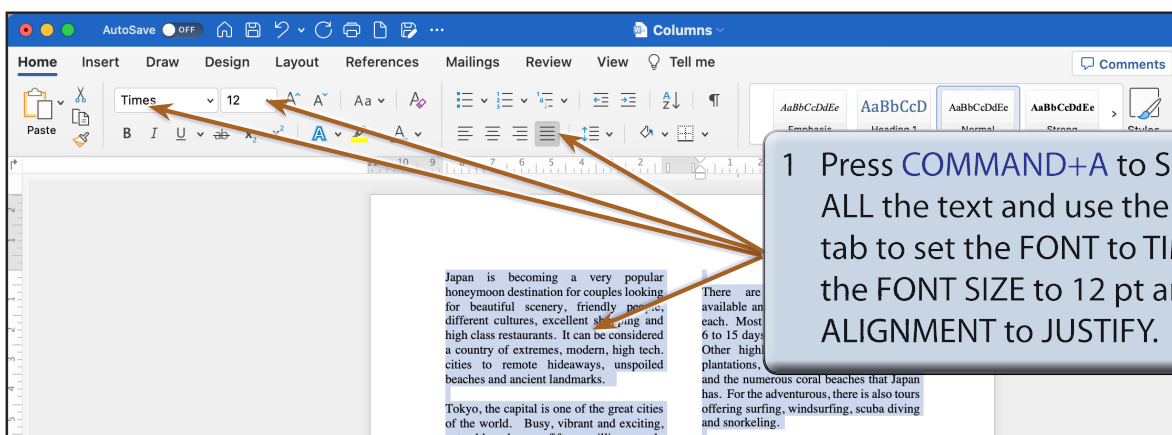

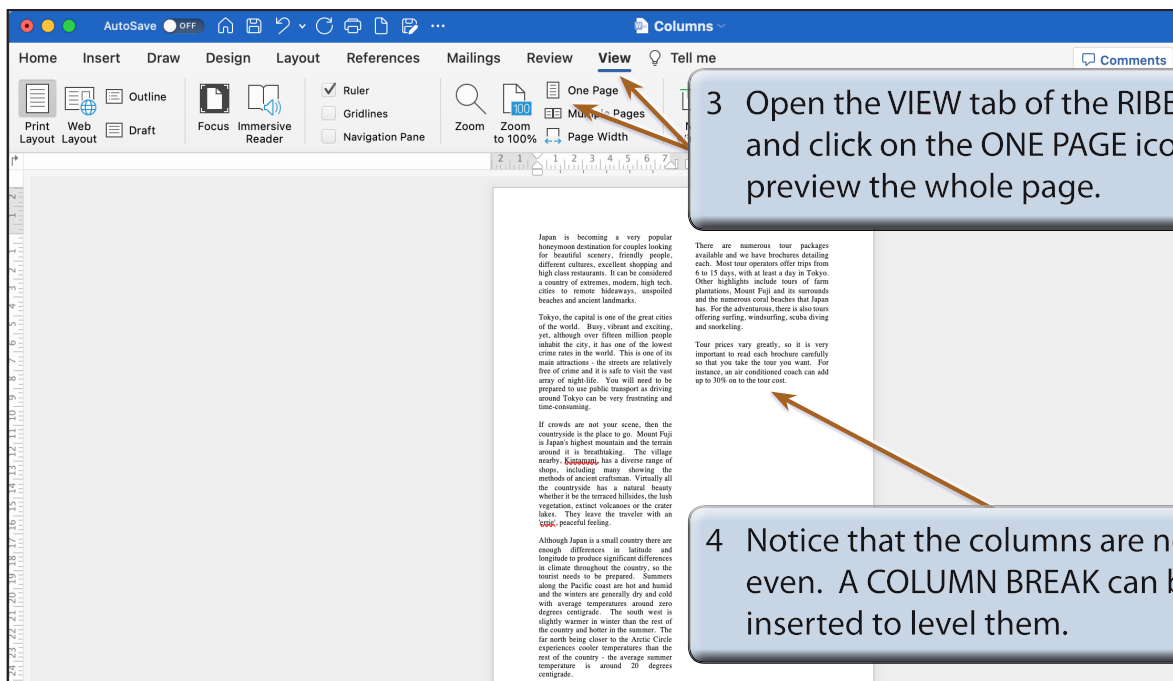

- 6 Press **COMMAND+S** to save the document.

C Justifying the Text

Text in columns usually looks better justified. That way all sides of the columns are straight.

- 2 Remove the highlight by clicking the mouse button with the I-BEAM over the text.

The screenshot shows the Microsoft Word 365 interface with the 'View' tab selected on the ribbon. The 'One Page' icon is highlighted with an orange arrow. A callout box points to this icon with the text: '3 Open the VIEW tab of the RIBBON and click on the ONE PAGE icon to preview the whole page.' Another callout box points to the text area with the text: '4 Notice that the columns are not even. A COLUMN BREAK can be inserted to level them.'

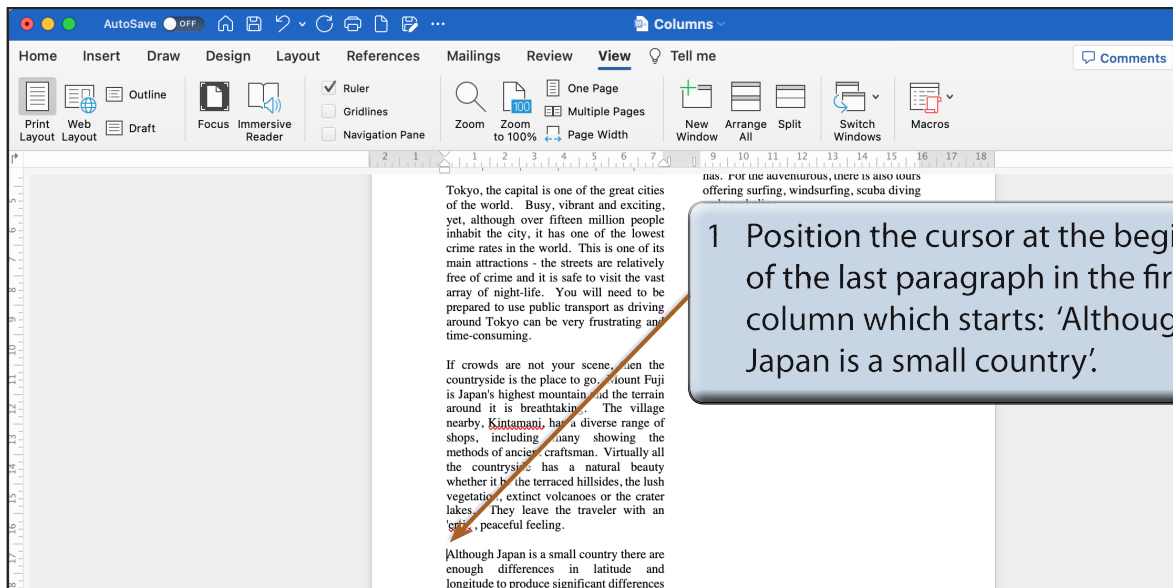

3 Open the VIEW tab of the RIBBON and click on the ONE PAGE icon to preview the whole page.

4 Notice that the columns are not even. A COLUMN BREAK can be inserted to level them.

5 Return the ZOOM to 100%.

D Inserting a Column Break

A COLUMN BREAK takes the text to the top of the next column. It is a similar to inserting a PAGE BREAK.

The screenshot shows the Microsoft Word 365 interface with the 'View' tab selected. The 'One Page' icon is highlighted. A callout box points to the beginning of the last paragraph in the first column with the text: '1 Position the cursor at the beginning of the last paragraph in the first column which starts: 'Although Japan is a small country'.'

1 Position the cursor at the beginning of the last paragraph in the first column which starts: 'Although Japan is a small country'.

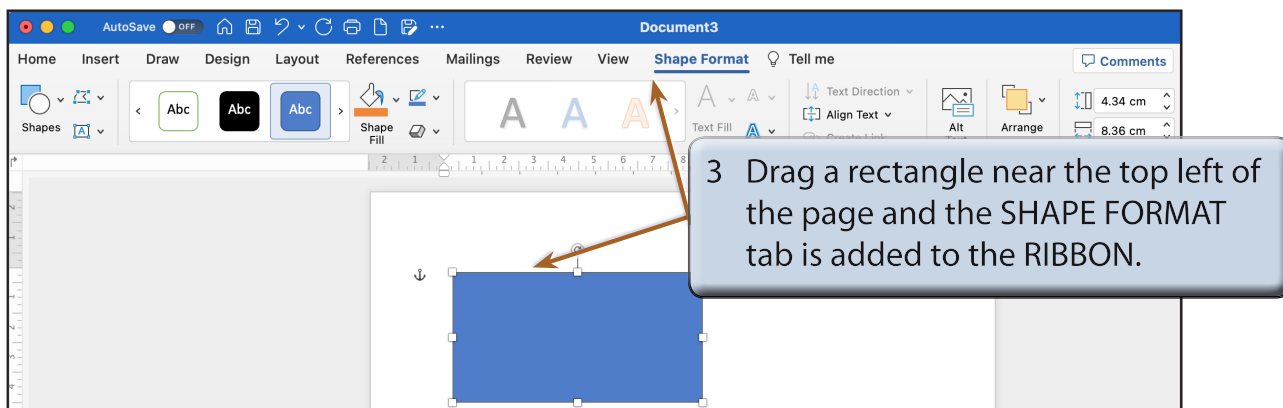

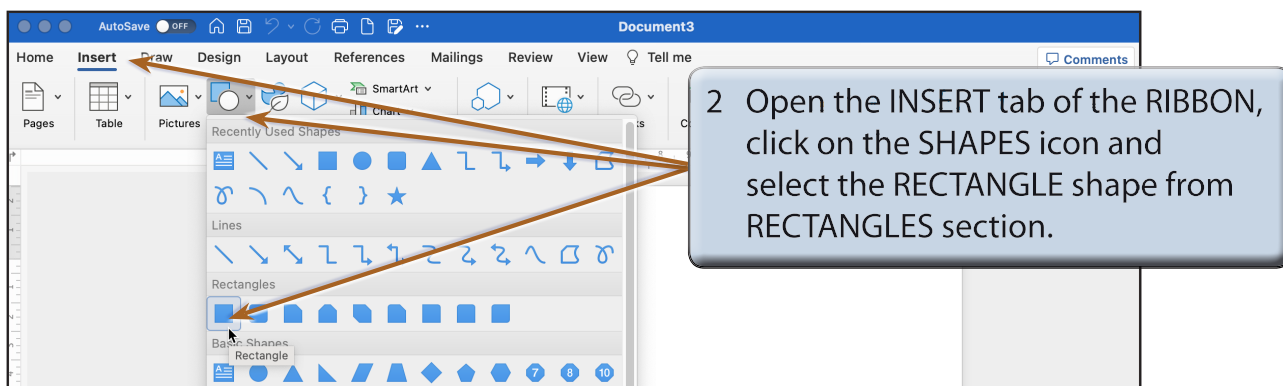

Drawing Tools

Microsoft Word provides extensive DRAWING TOOLS that allow you to enhance the appearance of your documents. You can use these tools to assist in the creation of detailed publications, newsletters, company logos, etc.

Drawing a Rectangle

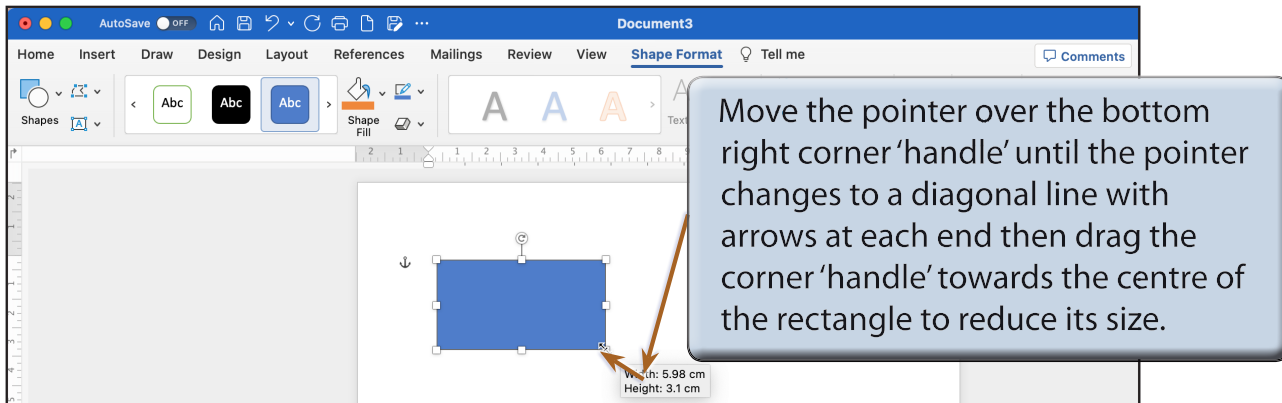

The DRAWING TOOLS are contained in the INSERT tab of the RIBBON. Let's start by drawing a rectangle.

- 1 Load Microsoft Word or close the current file and start a NEW DOCUMENT.

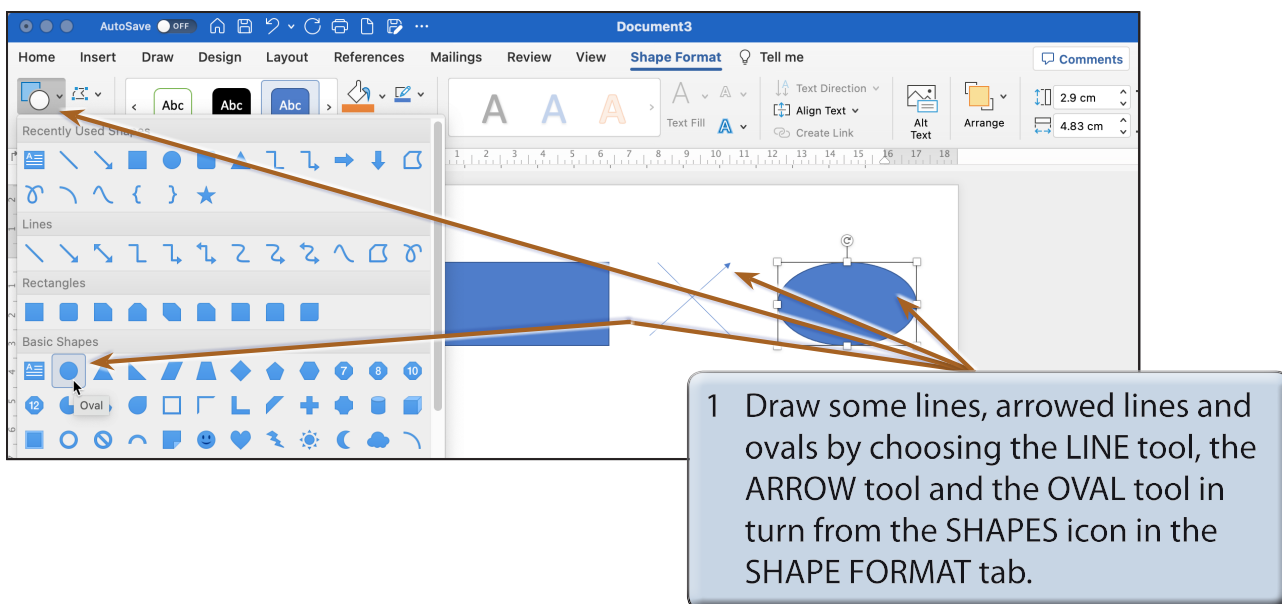

Resizing Shapes

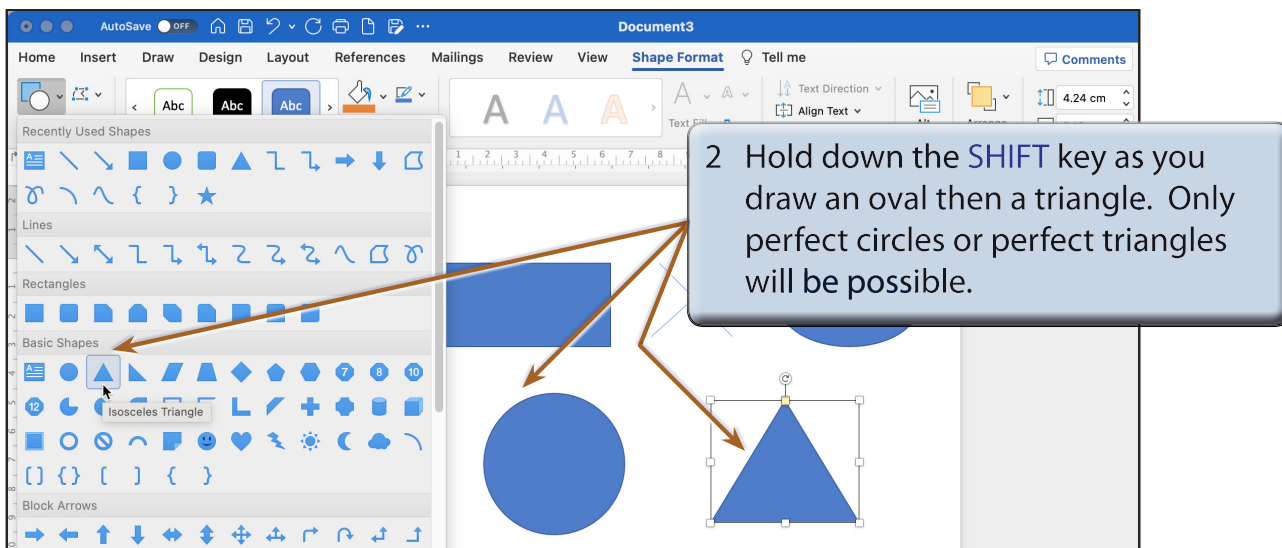

Notice that the rectangle has 'handles' (small shapes) around it. These allow the rectangle to be resized. The 'handles' at the corners allow for diagonal resizing. The 'handles' at the centre of the lines allow for either vertical or horizontal resizing. The circular 'handle' allows you to rotate the shape.

Drawing Other Shapes

You can insert other shapes from the SHAPES icon of the SHAPE FORMAT tab of the RIBBON or return to the INSERT tab of the RIBBON and use the SHAPES icon.

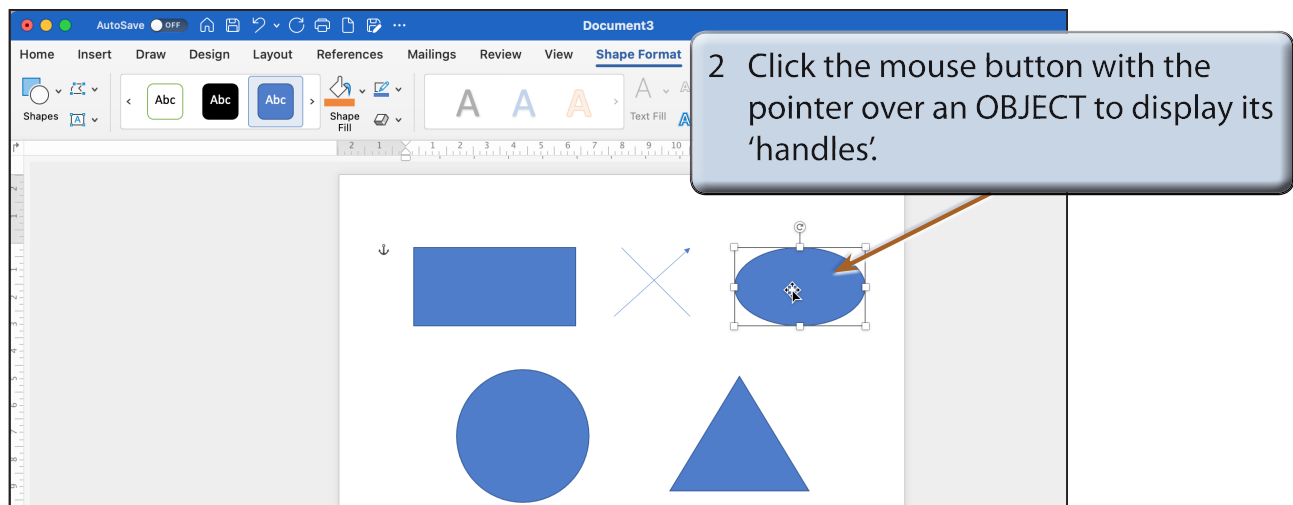

- NOTE:**
- i The SHIFT key causes all sides of an object to be the same size.
 - ii All objects created using the DRAWING TOOLS can be resized using their 'handles'.

Objects

Each shape drawn in Microsoft Word is said to be an OBJECT or separate entity. You select an OBJECT by placing the pointer over the OBJECT and clicking the mouse button. 'Handles' around the OBJECT tell you that it has been selected. The OBJECT can then be deleted, resized, copied or moved. (You've just seen how to resize.)

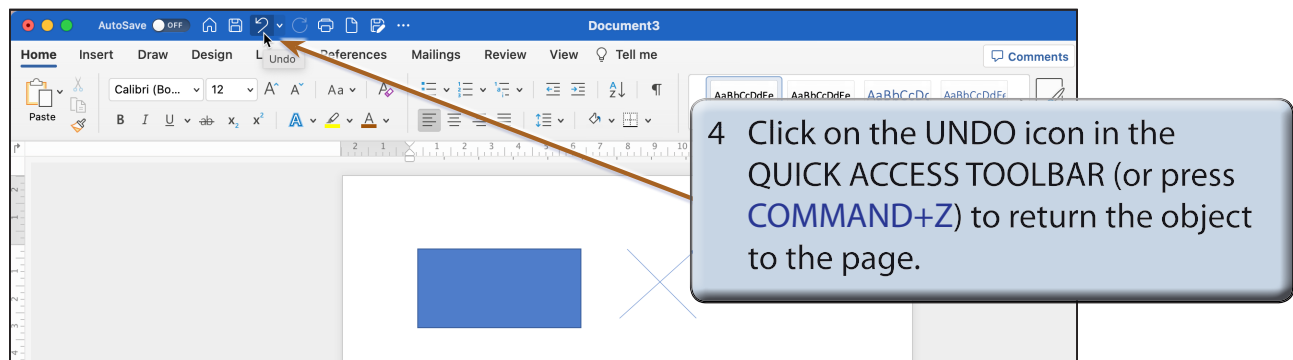

A Deleting Objects

- 1 You should have a number of OBJECTS on the screen at the moment.

NOTE: If an object is filled, you can click on the centre of the object to select it. If the object is not filled, you need to click on the border of the object away from a 'handle'.

3 Press the **DELETE** key and the OBJECT will be removed.

NOTE:

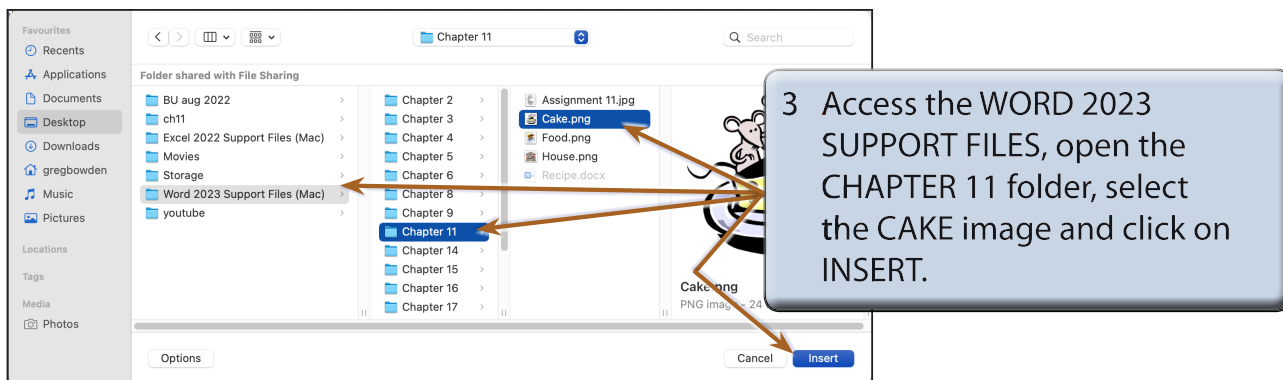

- i If you select multiple objects, the UNDO icon can be clicked each time to return each object to the page. Pressing **COMMAND+Z** will also undo previous steps.
- ii The CUT icon from the HOME tab can also be used to remove OBJECTS.

Inserting Media Into Documents

Microsoft Word allows you to insert images and video media into documents. This includes graphics created in other programs such as Adobe Photoshop, Adobe Illustrator or CoralDRAW. The inserted media can be formatted using the same tools that you used for shapes in the previous chapter.

Inserting an Image

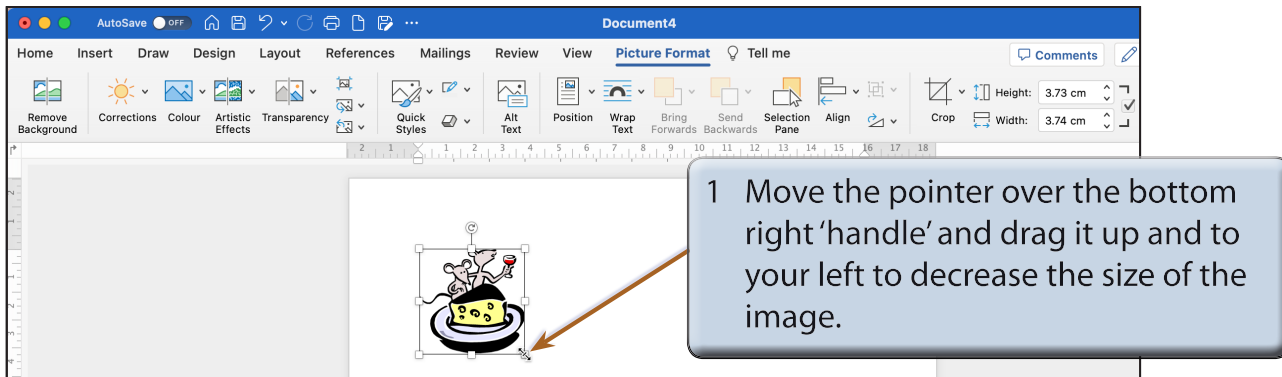

- 1 Load Microsoft Word or close the current file and start a NEW DOCUMENT.

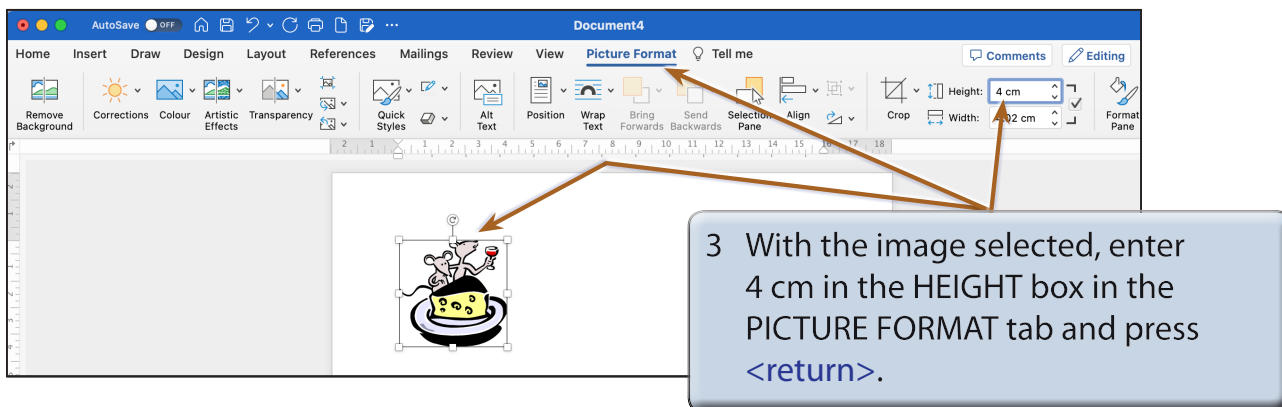

NOTE: The STOCK IMAGES and ONLINE PICTURES options within the PICTURES icon of the INSERT tab can be used to find images from the internet.

Changing the Size of the Image

You can change the size of the image in the same way as you did for shapes by dragging the 'handles' or by using the SIZE group of the RIBBON.

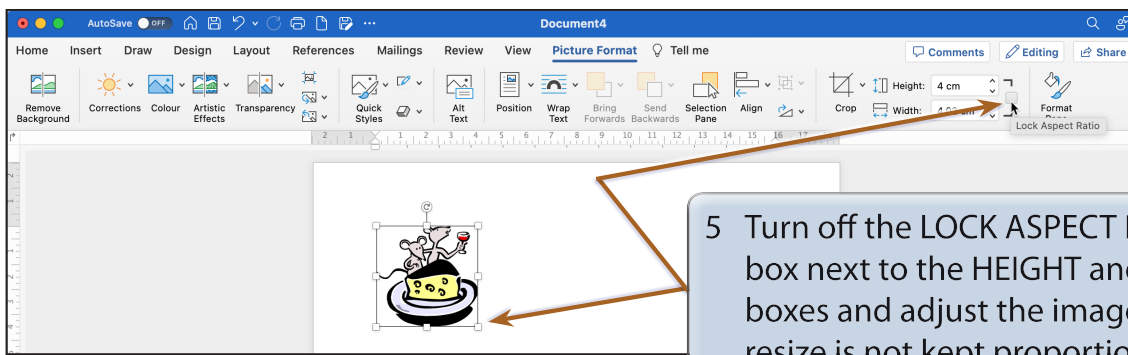

- 2 You can accurately resize an object using the PICTURE FORMAT tab.

NOTE: The image is resized and the WIDTH box is adjusted in the same ratio to keep the image size proportional.

- 4 If you want to adjust the size of an image without maintaining its proportions, then the ASPECT RATIO can be turned off.

- 6 Turn the LOCK ASPECT RATIO box back on and press **COMMAND+Z** to UNDO the last resize.

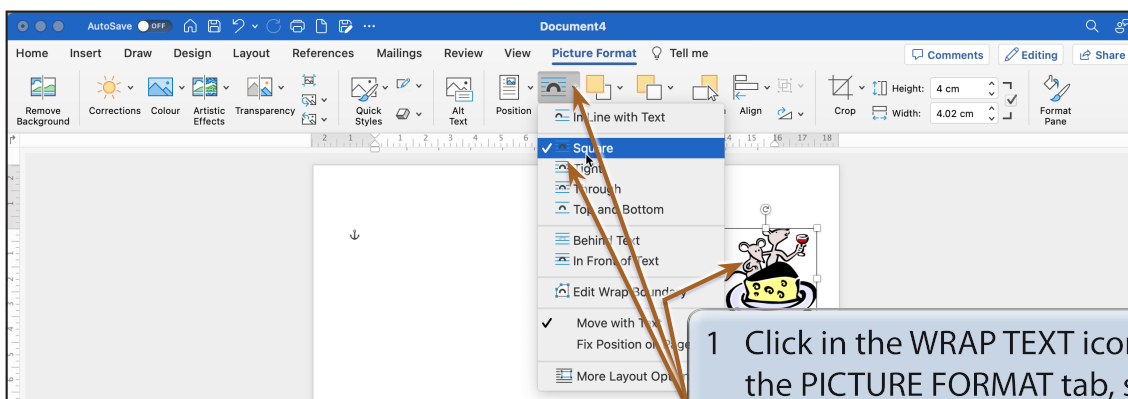

NOTE: Lock Aspect Ratio ensures that the proportions of the image are always kept the same so that the image is not distorted.

Picture Adjustments

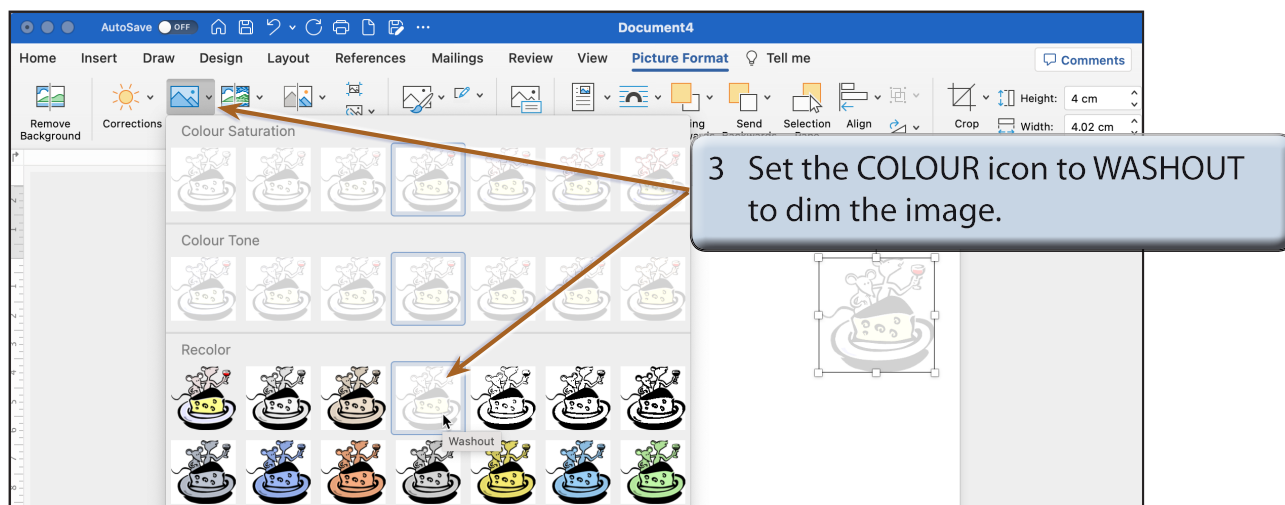

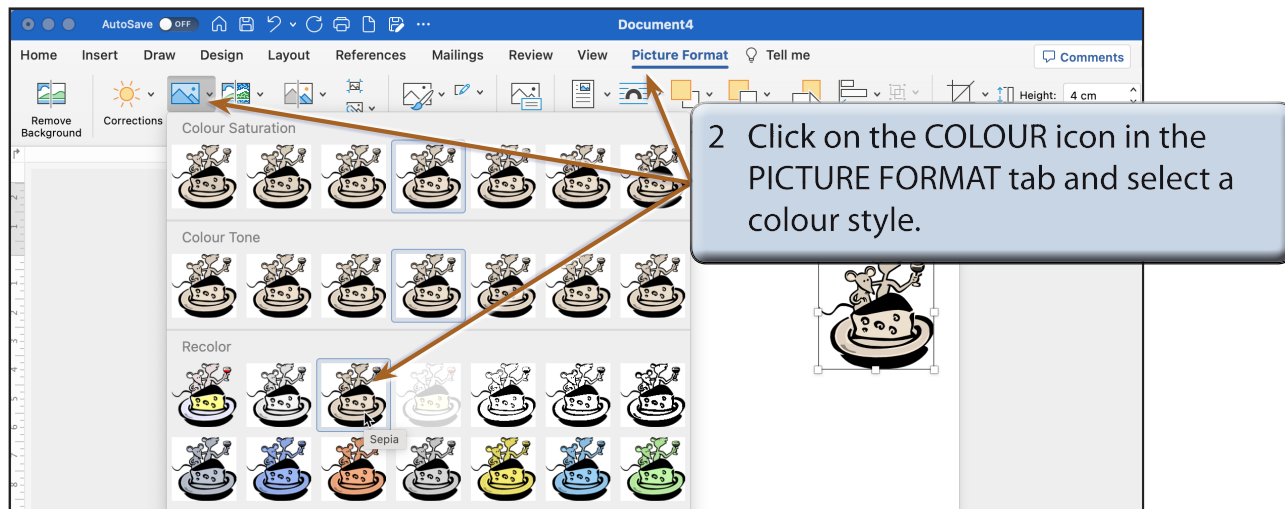

The appearance of an image can be adjusted using the icons in the ADJUSTMENT group.

A Colour Adjustment

The COLOUR icon allows you to adjust the colour style of the image.

NOTE: Moving the image to the right of the screen will allow you to see the adjustment effects that can be applied to it.

NOTE: Washout is used to create a watermark image when you want text to flow over the dimmed picture.
