

InDesign provides tools for creating online forms. These are exported to Adobe Acrobat as a PDF file and can be used to collect information from users. The information entered into the form and be sent to a web site or as an attachment in an e-mail.

Loading the Prepared File

The form labels have been prepared for you. The fields will need to be entered to complete the form.

- 1 Display the FILE menu and select OPEN.
- 2 Access the IDcs6 SUPPORT FILES, open the CHAPTER 21 folder and open the FORM document.
- 3 Use SAVE AS from the FILE menu to save the document in your STORAGE folder as:

Chapter 21 Form

Adding Text Fields to the Form

The most common field in a form is a TEXT field. It simply allows users to enter data such as names, addresses, comments, etc.

A Inserting a Text Frame

B Creating the Text Field

The text frame now needs to be converted into a text field.

NOTE: A text frame can also be converted to a text field by displaying the OBJECT menu, highlighting INTERACTIVE and selecting CONVERT TO TEXT FIELD.

Buttons and Fo Type: Name: Event:	rms Text Field Customer Name On Release or Tap	2	In the BUTTONS AND FORMS panel set the NAME box to CUSTOMER NAME and press <enter> or <return>.</return></enter>
Actions:	(No Actions Added)	3	No ACTIONS need to be set as this is a FIELD that just collects data, not a BUTTON that executes something.

4 The PDF OPTIONS need to be set.

- NOTE: i The DESCRIPTION will appear as a tool tip when a user hovers their mouse pointer over the field in Acrobat.
 ii Turning on REQUIRED means that the field must have data
 - entered into it before the form can be submitted.

C Duplicating a Text Field

The previous steps could be repeated to add an e-mail text field, but it is easier to duplicate the NAME field and adjust its settings.
