

# Animation Effects

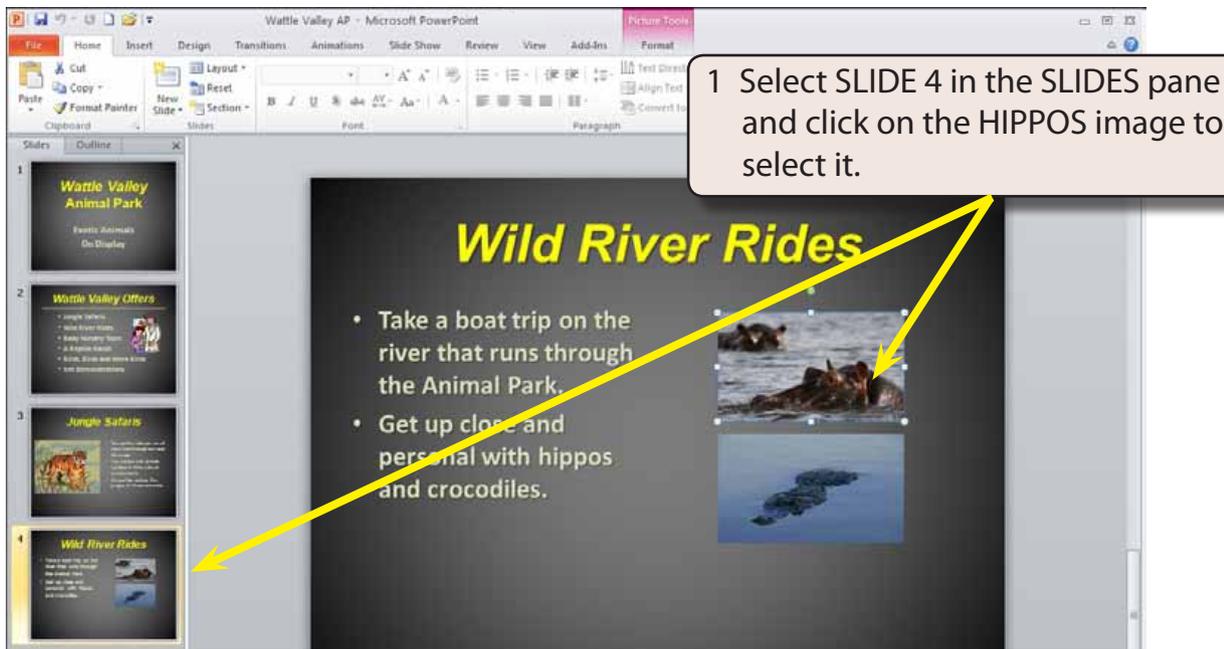

You can enhance the appearance of slides through the use of animation effects. For example, you can make text fly onto the screen one point at a time, dim it after it has been viewed, make graphics move around the screen or fade in and out, and add sounds to objects.

## Loading the Presentation

- 1 Load Microsoft PowerPoint or close the current presentation.
- 2 Click on the FILE tab and select OPEN.
- 3 Access your STORAGE folder and open the WATTLE VALLEY AP file.

## Adding Animation Effects

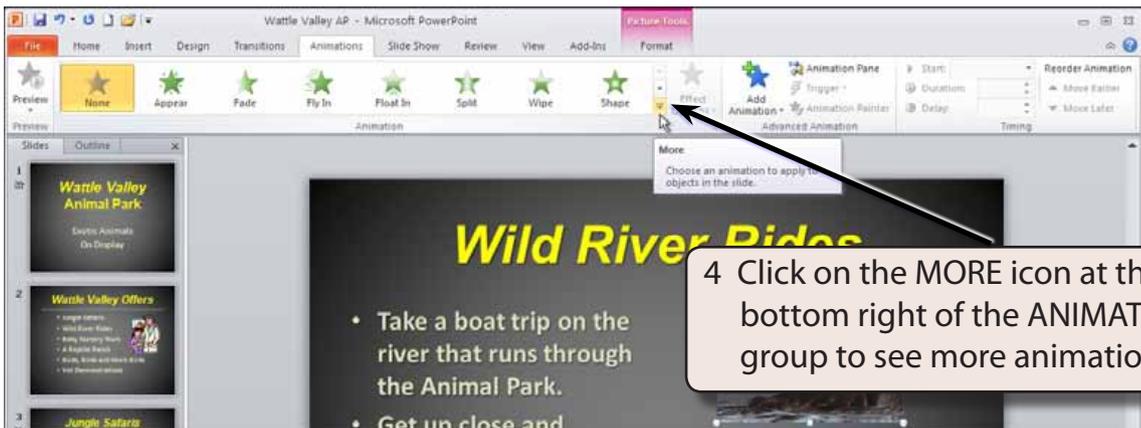

You can quickly apply effects to placeholders to animate their contents.

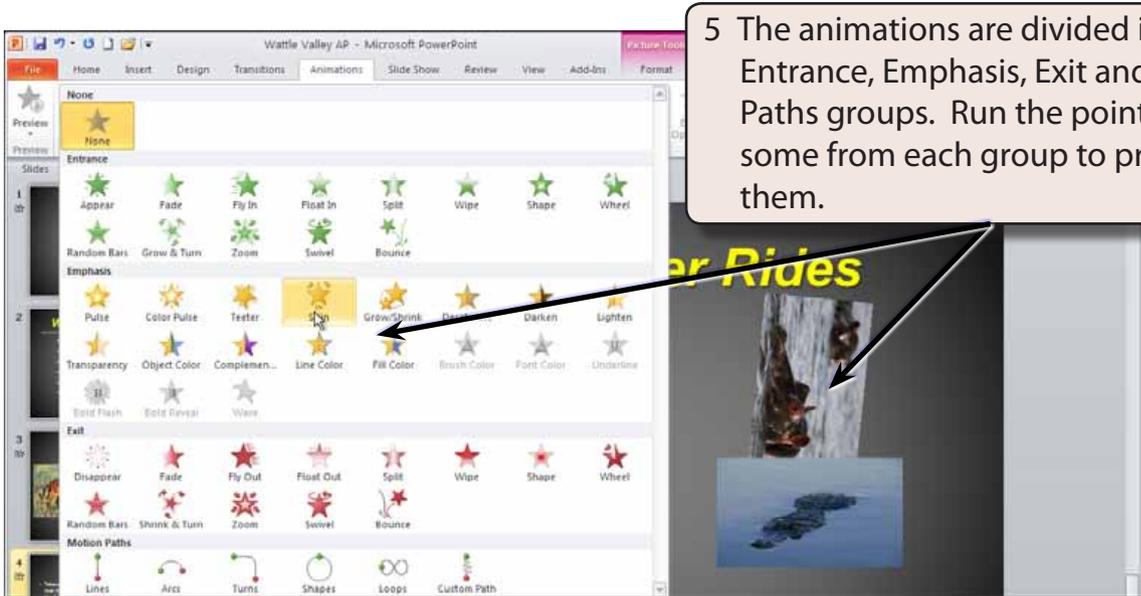

2 Open the ANIMATIONS tab of the RIBBON and move the pointer over some of the animation icons in the ANIMATION group.

3 The animation is previewed on the HIIPPOS placeholder each time.

4 Click on the MORE icon at the bottom right of the ANIMATION group to see more animations.

5 The animations are divided into Entrance, Emphasis, Exit and Motion Paths groups. Run the pointer over some from each group to preview them.

## Effect Options

Each effect has a series of options that can be applied to them. These effects vary for different animations.

- 2 Select an effect that you like.

## Adding Animation Effects

You can apply more than one animation effect to a placeholder. Additional animations play in to order that you apply them. Let's add an exit animation to the HIPPOS placeholder.

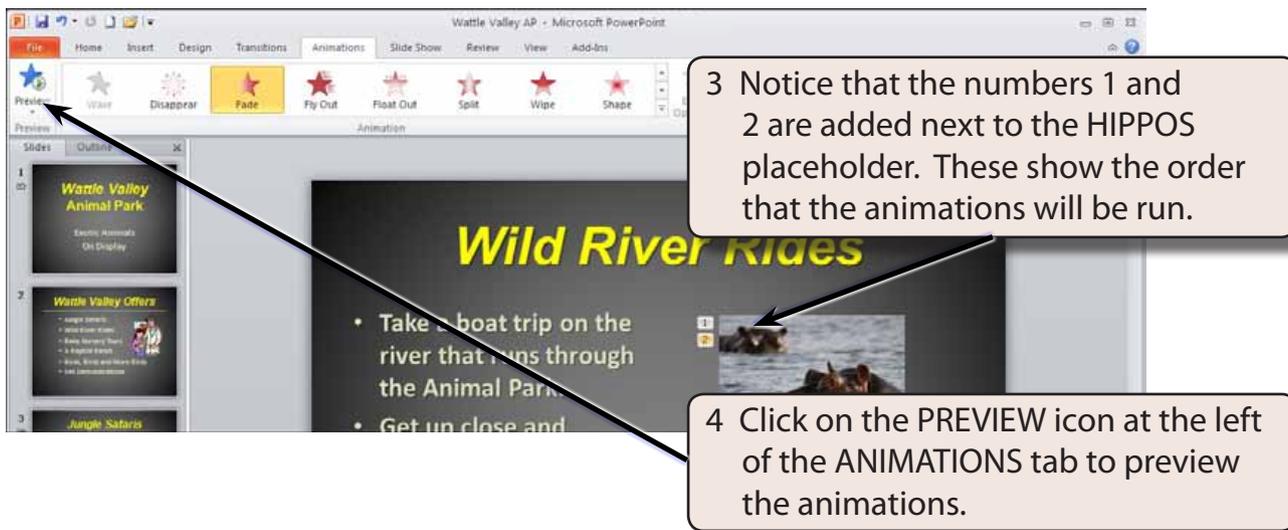

1 Check that the HIPPPPOS placeholder is selected then click on the ADD ANIMATION icon in the ANIMATIONS tab of the RIBBON.

2 In the list of animations select an EXIT ANIMATION such as FADE.

**NOTE: Exit animations are usually set to operate at the end of a slide.**

3 Notice that the numbers 1 and 2 are added next to the HIPPOS placeholder. These show the order that the animations will be run.

4 Click on the PREVIEW icon at the left of the ANIMATIONS tab to preview the animations.

## Copying Animations

Once you create a set of animations that you like, you can apply those animations to other placeholders. Let's apply the animations that are on the HIPPOS placeholder to the CROCODILE placeholder.

1 Select the HIPPOS placeholder and click on the ANIMATION PAINTER icon in the ANIMATIONS tab.
