

Selecting Parts of Images

An important feature of any graphics program is its ability to select parts of images. This might include separating a image from its background or removing a background. In this chapter you will learn how to select parts of images using a variety of different tools.

Loading a Sample Image

A sample photo will be opened and some editing carried out on it.

- 1 Load Photoshop or close the current file.
- 2 Click on the OPEN button in the WELCOME screen or display the FILE menu and select OPEN.
- 3 Access the PScC SUPPORT FILES folder.

- 6 Press **CTRL+0** or **COMMAND+0** to set the zoom to FIT ON SCREEN so that the image fills the screen.

The Editing Tools

Photoshop offers numerous ways of selecting parts of an image. Some of them are the basic, such as the EDIT MARQUEE TOOL and the LASSO TOOL, however, some are much more powerful, such as the OBJECT SELECTION TOOL and the MAGIC WAND TOOL.

The Edit Marquee

There are two main edit marquees, one is rectangular and the other is an oval.

A The Rectangular Marquee Tool

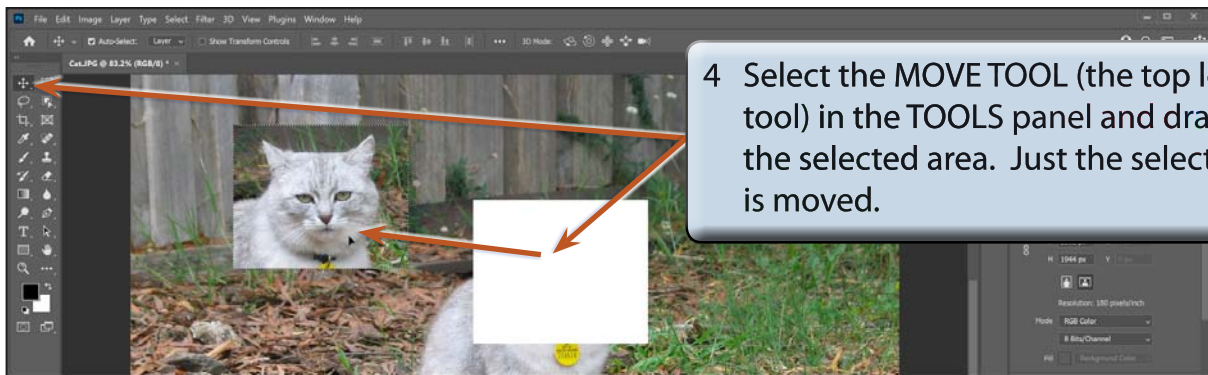

1 Move the pointer over the EDIT MARQUEE TOOL (the top right tool) in the TOOLS panel, hold down the mouse button and the edit marquees should be displayed.

2 Select the RECTANGULAR MARQUEE TOOL.

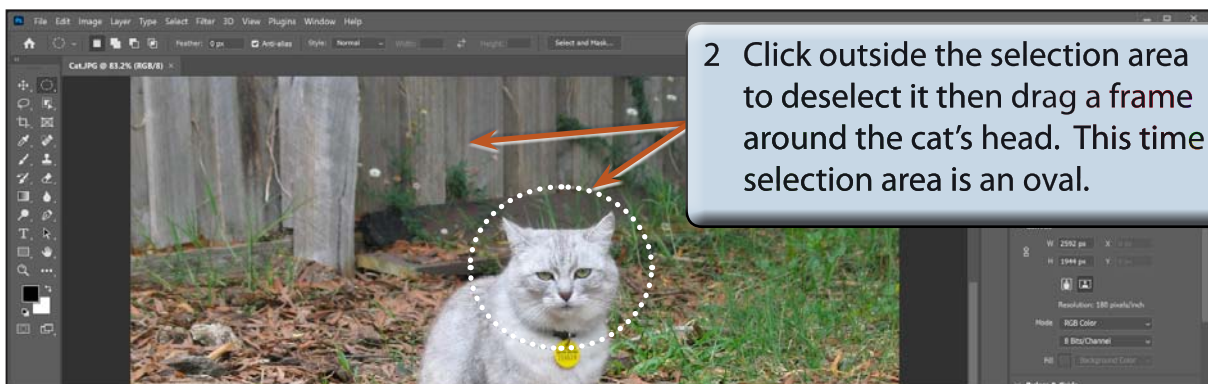

3 Drag a frame around the cat's head.

NOTE: A frame of 'marching ants' is added to the screen to highlight the selection. This selected area can be moved, copied, rotated, resized, transformed and adjusted.

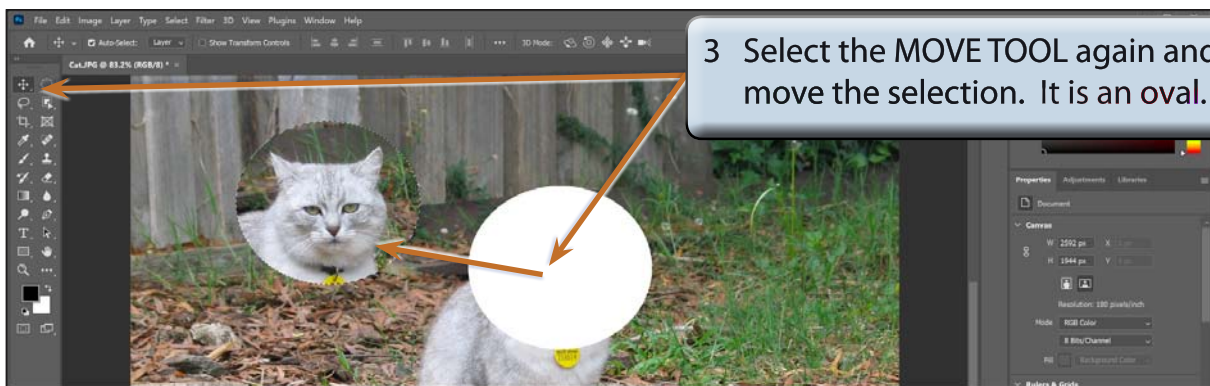

- 5 Press **CTRL+Z** or **COMMAND+Z** (or select UNDO MOVE from the EDIT menu) to return the selected area to its original position.

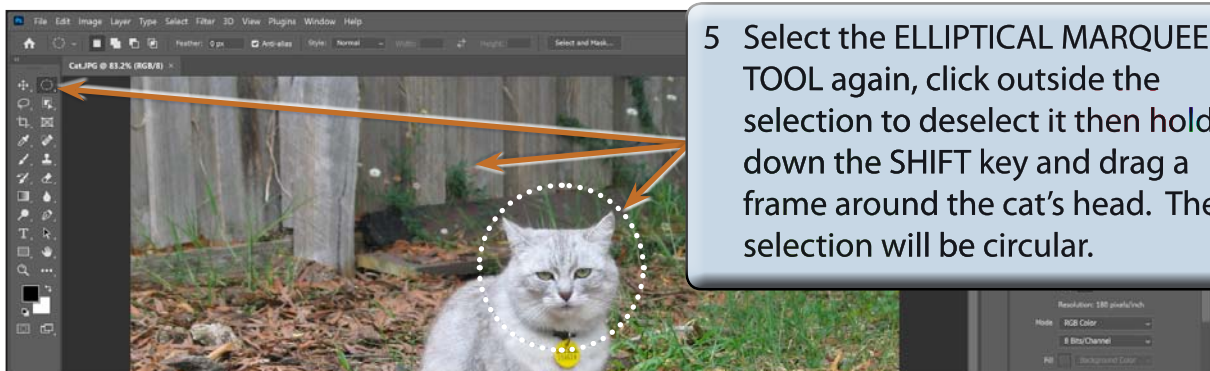

B The Elliptical Marquee Tool

NOTE: When you select the EDIT MARQUEE TOOL you can press **SHIFT+M** to toggle between the tools contained within the EDIT MARQUEE TOOL.

4 Press **CTRL+Z** or **COMMAND+Z** to undo the move.

NOTE: The SHIFT causes the ellipse to be a circle. If you hold down the SHIFT key and drag the RECTANGULAR MARQUEE TOOL, a square selection area is drawn.

Deselecting Objects

When you select an area on the screen it remains selected until you select another area. To turn a selection off:

Press **CTRL+D** or **COMMAND+D** and the selection should be removed.
